

Guide to Fruit Crop Protection 2010

Available MAY 24, 2010

This comprehensive guide features current pest management recommendations for Manitoba's commercial fruit growers.

Herbicide, fungicide/bactericide and insecticide charts by crop are included as well as product labels for over 100 products. Pesticide safety, calibration tables and pesticide groups round out this comprehensive resource for the commercial grower.

Featured crops are: strawberries, raspberries, saskatoons, chokecherries, gooseberries, currants, cherries (sweet & sour).

This guide is an update to the 2004 Fruit Crop Protection Guide.

This publication was developed in co-operation with **Manitoba Agriculture, Food and Rural Initiatives' Crops Knowledge Centre** and the **Prairie Fruit Growers Association**.

The printing of this publication was funded by the Prairie Fruit Growers Association.

This guide provides only general information. Refer to the product label for application instructions.

Pages: 103

Price: \$15.00 for members of Prairie Fruit Growers Association
\$25.00 for non-members
