

## AGRICULTURE statistics

### MANITOBA FARM CASH RECEIPTS January to December 2006R - 2011P

Preliminary farm cash receipt estimates for the 2011 calendar year Manitoba farmer gross revenues of \$4.379 billion from the sale of crops and livestock in 2011, down 2.7% from \$4.506 billion the previous year and an increase of 14.6% compared to the 10 year average.

When direct program payments are included, estimates show that Manitoba farm cash receipts, the sum of direct program payments, crop and livestock market receipts, totaled \$4.889 billion in 2011, up 0.8% from \$4.852 billion in 2010. This is an increase of 15.0% from the previous 10 year average.

In 2011, crop market receipts were \$2.502 billion, a drop of 8.8% from \$2.743 billion in 2010, led by canola, wheat, soybeans and oats. Production challenges included excess moisture and delaying seeding followed by dry mid-summer conditions in several areas of the province. Tough growing conditions in 2010 and 2011 led to production declines of more than 20% for both wheat and canola.

Canola receipts were \$1.020 billion in 2011, down 8.8% from 2010; wheat receipts were \$625 million in 2011, an increase of 11.3% from 2010; receipts for soybean were \$153 million in 2011, up 65.5% from 2010; and receipts for oats were 129 million, down 4.6% from 2010.

Grain and oilseed prices in 2011 rose in response to tight global supply relative to use, as demand for feed and biofuels continued to rise while a drought and subsequent export restrictions in Russia and the Ukraine in 2010 constrained supplies well into 2011.

In 2011, livestock market receipts reached \$1.877 billion, a rise of 6.7% from \$1.760 billion in 2010. Prices for hogs and for cattle and calves, which started rising in spring 2010, continued to increase throughout 2011, primarily because of low North American inventories and high feed grain costs.

Hog receipts rose 12.8% to \$921 million in 2011, as prices rose to their highest level since 2001. The average price for hogs in 2011 was 14.5% higher than the previous year. Cattle receipts in 2011 were \$363 million, down 7.2% from 2010 while receipts for calves were \$59 million in 2011, up 10.1% from 2010. Lower on-farm inventories limited the supply of market animals.

Receipts from supply-managed commodities were \$458 million in 2011, up 6.7% from 2010 due to a 6.7% increase in dairy receipts and a 12.4% improvement in poultry receipts since egg receipts were only down 0.6%.

Manitoba farmers received \$509 million in program payments in 2011, an increase of 45.8% from 2010. The main contributors to the rise were increases in crop insurance payments, primarily a result of unseeded acreage from excess moisture.
