July 9, 2008

Gordon Dearsley, CAO
Rural Municipality of Argyle
132 - 2nd Street North, Box 40
Baldur MB R0K 0B0

Dear Mr. Dearsley:

Enclosed is Environment Act **Licence No. 2840** dated July 9, 2008 issued in accordance with The Environment Act to the **Rural Municipality of Argyle** for the construction and operation of the Development being a water treatment and supply system for the community of Baldur, with wells in SW 36-4-14W and NE 35-4-14W (south wellfield) and NE 14-5-14W (north well) and a reverse osmosis water treatment plant located in the community in SE 14-5-14W, with the discharge of reject water through a pipeline to Oak Creek in SE 14-4-14W, in accordance with the Proposal filed under The Environment Act dated April 21, 2008.

In addition to the enclosed Licence requirements, please be informed that all other applicable federal, provincial and municipal regulations and by-laws must be complied with.

For further information on the administration and application of the Licence, please feel free to contact Peter Crocker, Environment Officer at (204) 726-6565.

Pursuant to Section 27 of The Environment Act, this licencing decision may be appealed by any person who is affected by the issuance of this Licence to the Minister of Conservation within 30 days of the date of the Licence.

Yours truly,

Tracey Braun, M. Sc.
Director
Environment Act

LICENCE

Licence No. / Licence n° 2840

Issue Date / Date de délivrance July 9, 2008

In accordance with The Environment Act (C.C.S.M. c. E125) /
Conformément à la Loi sur l'environnement (C.P.L.M. c. E125)

Pursuant to Section 10(1) / Conformément au Paragraphe 10(1)

THIS LICENCE IS ISSUED TO : / CETTE LICENCE EST DONNÉE À :

RURAL MUNICIPALITY OF ARGYLE; "the Licencee"

for the construction and operation of the Development being a water treatment and supply system for the community of Baldur, with wells in SW 36-4-14W and NE 35-4-14W (south wellfield) and NE 14-5-14W (north well) and a reverse osmosis water treatment plant located in the community in SE 14-5-14W, with the discharge of reject water through a pipeline to Oak Creek in SE 14-4-14W, in accordance with the Proposal filed under The Environment Act dated April 21, 2008, and subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence,

"**accredited laboratory**" means an analytical facility accredited by the Standard Council of Canada (SCC), or accredited by another accrediting agency recognized by Manitoba Conservation to be equivalent to the SCC, or be able to demonstrate, upon request, that it has the quality assurance/quality control (QA/QC) procedures in place equivalent to accreditation based on the international standard ISO/IEC 17025, or otherwise approved by the Director; and

"**as constructed drawings**" means engineering drawings complete with all dimensions which indicate all features of the Development as it has actually been built.

GENERAL TERMS AND CONDITIONS

This Section of the Licence contains requirements intended to provide guidance to the Licencee in implementing practices to ensure that the environment is maintained in such a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for present and future Manitobans.

1. The Licencee shall, in addition to any of the following specifications, limits, terms and conditions specified in this Licence, upon the request of the Director:
 - (a) sample, monitor, analyse or investigate specific areas of concern regarding any segment, component or aspect of pollutant storage, containment, treatment, handling, disposal or emission systems, for such duration and at such frequencies as may be specified;
 - (b) determine the environmental impact associated with the release of any pollutants from the Development;
 - (c) conduct specific investigations in response to the data gathered during environmental monitoring programs; or
 - (d) provide the Director, within such time as may be specified, with such reports, drawings, specifications, analytical data, flow rate measurements and such other information as may from time to time be requested.
2. The Licencee shall design, construct and operate the water treatment and supply system in accordance with Manitoba Regulations under the Public Health Act and the Drinking Water Safety Act and all operating requirements as recommended by Manitoba Water Stewardship.
3. The Licencee shall properly train or qualify individuals to carry out the operation of the Development.
4. The Licencee shall collect and dispose of all used oil products and other regulated hazardous wastes generated by the machinery used in the construction and operation of the Development in accordance with applicable Manitoba Conservation and legislation requirements.
5. The Licencee shall revegetate soil exposed during the construction of the Development with native or introduced grasses or legumes. Native species shall be used to revegetate areas where native species existed prior to construction. Revegetation is not required for pipelines installed by chain trenching or ploughing on previously disturbed ground including road allowances.
6. The Licencee shall not alter local drainage patterns by the construction of the Development, including inflows and outflows from small wetlands adjacent to the route of pipelines.
7. The Licencee shall not permit the interconnection of a private water supply system with the Development.

8. The Licencee shall maintain the water supply wells associated with the Development to prevent the contamination of groundwater by surface water:
 - (a) entering the well casings through the top of the casings;
 - (b) entering the well casings through the sides of the casings; and
 - (c) seeping down the outside of the casings to the groundwater.
9. The Licencee shall:
 - (a) prepare as constructed drawings for the Development and shall label the drawings "As Constructed"; and
 - (b) provide to the Director, within one year of the completion of construction of the Development, two sets of as constructed drawings.

SPECIFICATIONS, LIMITS, TERMS AND CONDITIONS

10. The Licencee shall, during construction of the Development, dispose of non-reusable construction debris at a waste disposal ground operating under the authority of a permit issued under *Manitoba Regulation 150/91* respecting *Waste Disposal Grounds* or any future amendment thereof, or a Licence issued pursuant to The Environment Act.
11. The Licencee shall not release chlorinated water from pipeline testing and startup activities associated with the Development to a surface water body until chlorine level concentrations are equal to or less than 0.1 milligrams per litre. Releases of chlorinated water at higher concentrations may be made to vegetated land or dry waterways, provided that chlorine level concentrations have decayed to 0.1 milligrams per litre or less before the released water reaches any body of surface water.
12. The Licencee shall, during construction and operation of the Development:
 - (a) immediately report any reportable spills to Manitoba Conservation's Accident Reporting Line at (204) 944-4888; and
 - (b) provide a follow-up report to the Director on a reportable environmental accident outlining the cause(s) and proposing corrective action to prevent reoccurrence.
13. The Licencee shall, at all times during the construction of the Development, maintain materials to contain and recover spills of fuel and other fluids associated with construction machinery at construction sites.

14. The Licencee shall establish fuel storage and equipment servicing areas for the construction and operation of the Development:
 - (a) a minimum distance of 100 metres from any waterbody; and
 - (b) in compliance with the requirements of *Manitoba Regulation 188/2001* respecting *Storage and Handling of Petroleum Products and Allied Products*, or any future amendment thereof.
15. The Licencee shall conduct an effluent monitoring program as described in Clauses 16 to 19 of this Licence, for a period of two years commencing with the operation of the Development. Following this period, the duration of the monitoring program may be extended by the Director if the results, in the opinion of the Director, indicate that a longer monitoring period is appropriate.
16. The Licencee shall, on a quarterly basis for the duration of the effluent monitoring program, collect grab samples at locations approved by the Director in the wastewater stream within the water treatment plant and upstream and downstream of the effluent discharge pipeline outlet on Oak Creek.
17. The Licencee shall transport the grab samples collected pursuant to Clause 16 of this Licence, to an accredited laboratory for analysis. The samples shall be stored and transported in accordance with procedures specified by Manitoba Water Stewardship to ensure that the samples are suitable for analysis.
18. The Licencee shall, at an accredited laboratory, have the samples collected pursuant to Clause 16 of this Licence, analysed for the following parameters:
 - (a) calcium;
 - (b) chloride;
 - (c) manganese;
 - (d) sulphate;
 - (e) nitrate-nitrite; and
 - (f) total dissolved solids.
19. The Licencee shall, not more than 30 days after the results of each quarterly analysis are available, submit the results to the Director.
20. The Licencee shall, each winter during the operation of the Development:
 - (a) monitor ice accumulation in Oak Creek at the effluent discharge pipeline outlet, and
 - (b) take action as may be necessary to prevent flooding on Oak Creek due to ice accumulation from the operation of the Development.

REVIEW AND REVOCATION

- A. If, in the opinion of the Director, the Licencee has exceeded or is exceeding or has or is failing to meet the specifications, limits, terms, or conditions set out in this Licence, the Director may, temporarily or permanently, revoke this Licence.
- B. If construction of the development has not commenced within three years of the date of this Licence, the Licence is revoked.
- C. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 10 of The Environment Act.
