Subject: Riverdale Municipality - Rivers Wastewater Treatment Lagoon File: 396.10

Thank you for providing liner installation reports for the three cells of the new wastewater treatment lagoon as follows:

<u>Date</u>	<u>Cell</u>
December 4, 2018	Primary Cell
November 8, 2018	Secondary Cell 1
October 24, 2018	Secondary Cell 2

I inspected the liner installation for Secondary Cell 2 on October 29, 2018 and for Secondary Cell 1 and the Primary Cell on November 9, 2018, and provided interim approvals to place cover material on completed cell liners on October 30, November 9 and December 4.

The liner meets the requirements of Clause 18 of Environment Act Licence No. 1189 R. Approval is provided under Clause 21 of the Licence to place cover material on the liners and to use the wastewater treatment lagoon once the cover material is placed and associated splash pads and pipe connections are completed.

Record drawings for the project are due within four months of this approval as required by Clause 16 of the Licence. As I understand that the final placement of cover material and associated finishing work may not be completed until the spring or early summer of 2019, I request that record drawings be provided within four months of the date of first use of the facility.

A decommissioning plan for the existing wastewater treatment lagoon is required by Clause 35 of the Licence. I request that this plan be provided on the same date as the record drawings, within four months of the date of first use of the facility.
