**RE: Licence No. 135 HW issued to the Rural Municipality of Shell River**

The RM of Shell River is requesting an alteration of our operating permit, Licence No. 135 HW, to relocate the EcoCentre from its current location on Lot 1 Plan 1944 in NW 1/4 04-26-28 WPM to the Roblin/Shell River Waste Disposal Site located approximately 3 miles north of Roblin on Highway #83, being Lot 1 Plan 31679, org. SE 1/4 29-26-28W, Waste Disposal Ground Operating Permit No: 3011.65.

Attached are the Dangerous Goods Handling and Transportation Act Application Form, reports/plans supporting the application and the \$250.00 application fee.

Please advise if you require additional information or if you have any questions or concerns. I can be reached at 204-937-4430 or by email [shellrvr@mymts.net](mailto:shellrvr@mymts.net).

Yours truly,

Dione Cherneski, CMMA  
Chief Administrative Officer

## **RELOCATION REQUEST FOR THE SHELL RIVER/HILLSBURG ECO-CENTRE**

The RM of Shell River and the RM of Hillsburg are requesting to relocate the Shell River/Hillsburg EcoCentre to the existing Roblin/Shell River Waste Disposal Ground location, Operating Permit No: 311.65.

The land use designation for the site is *Waste Disposal* and the zoning of the adjoining land as identified in the RM of Shell River Zoning By-Law is RG – Rural General Zone.

In addition to accepting waste, the council feels it would be beneficial to also offer the recycling of:

- Used oil
- Used filters
- Used oil containers
- Used antifreeze
- Used antifreeze containers

at the same location.

In 2013, 4900 litres of used oil, 1,081.8 kg used oil filters, and 619 kg plastic oil jugs were collected at our current site. These items were picked up in February, March, June, August and September.

At the current location, a 10' x 24' metal building is positioned on skids for ease of moving or transfer if required. It can be loaded onto a flat deck trailer and moved to the new location. Effective signage is in place on the existing building.

The loading area will be situated on an impermeable material and graded to at least six feet outside the perimeter of the building. The type and capacity of the containers used for handling/storage is a 4500 L tank enclosed inside the metal 10' x 24' EcoCentre building that includes 110% containment. Registered collectors are equipped with power take off units to remove the used oil from the tank. Also, inside the facility, will be drums for the collection of filters and bags for the collection of containers.

Hours of operation at the new location would be the same as the landfill site Hours, which are posted at the entrance gate, and are as follows:

**Summer Hours (April 15 to October 15)**

Tuesday and Thursday 12:00 – 8:00 PM

Friday and Saturday 10:00 AM – 5:30 PM

**Winter Hours (October 16 to April 14)**

Tuesday and Thursday 11:00 AM – 3:30 PM

Friday and Saturday 11:00 AM – 3:30 PM

Attached is a map for the storage location within the facility and a copy of the Certificate of Title.

We are hopeful with approval and relocation the new site will be operational early in the New Year to coincide with our municipal amalgamation January 1.
