

THE RETAIL SALES TAX ACT

DENTISTS, DENTURISTS AND DENTAL LABORATORIES

This bulletin explains the application of retail sales tax (RST) to dentists, denturists and dental laboratories.

GENERAL INFORMATION

Retail sales tax is not applicable to professional services provided by dentists, denturists and dental labs. Generally, dentists, denturists and dental labs are required to pay retail sales tax on equipment and supplies which they buy and use in providing their service, **except for** dental appliances, dentures and drugs that are exempted from the tax.

The exemption for dentures includes full and partial dentures, crowns, bridges and any kind of dental filling or material forming part of the denture.

REGISTRATION

Dentists, denturists and dental labs who buy all their equipment and supplies from registered sellers who collect the Manitoba retail sales tax, are not required to register for retail sales tax purposes. However, if a dentist, denturist or dental lab purchases any equipment or taxable supplies from a seller who does not collect the Manitoba retail sales tax, the dentist, denturist or dental lab must apply to the Taxation Division for registration in order to comply with the self-assessment and tax payment requirements.

REPORTING REQUIREMENTS

Dentists, denturists and dental labs who are registered regularly receive a tax return from the Taxation Division for the purpose of reporting and paying the retail sales tax owing on their purchases of equipment and taxable supplies.

The following listings of exempt and taxable items have been prepared to assist in calculating and reporting the retail sales tax payable on purchases from sellers who have not collected the applicable Manitoba retail sales tax.

**Tax Exempt
Equipment and
Supplies**

THE FOLLOWING ARE EXAMPLES OF ITEMS EXEMPTED FROM RETAIL SALES TAX:

- Acrylic forming part of dentures or dental appliances including denture repair acrylic, orthodontic appliance acrylic and temporary crown acrylic (but not including tray acrylic).
- Anesthetics, either topical or injectable (but not including syringes and needles).
- Artificial teeth for complete or partial dentures.
- Cavity liners, cement, varnish and bonding agents incorporated into permanent or temporary filling materials.
- Crown forms, both temporary and permanent.
- Dental appliances when sold on prescription of a dentist including orthodontic appliances, night guards and space maintainers (but not including toothbrushes, toothpicks and dental floss).
- Denture liners and reline materials including tissue conditioner.
- Drugs used by a dentist in treating a patient or prescribed by a dentist to a patient, including the following examples:
 - ammonia inhalants,
 - calcium hydroxide,
 - camphorated parachlorophenol,
 - cresatin metacresylacetate,
 - eugenol,
 - formocresol,
 - hemostatic agents,
 - metacresylacetate,
 - socket paste.
- Filling materials including alloy amalgams, composites, temporary filling materials and any other materials that are incorporated into the filling.
- Gutta percha points.
- Plaster separator used for making dentures.
- Pulp canal sealer.
- Screw pins and posts (including pin and post kits).
- Sutures.
- Wax used to form denture bite blocks (but not including impression wax or border moulding wax).
