

PARENT CHILD COALITIONS

- Parent Child Coalitions bring together parents, early childhood educators, educators, health care professionals and other community organizations to plan and work collaboratively to support the healthy development of children aged 0-6 years. Research shows that experience-based brain development in the early years affects learning, behaviour and health throughout the life course (The Early Years Study, 1999).
- Parent Child Coalitions support existing community programs for families with young children and develop new initiatives that reflect each community's diversity and strengths. Coalition partners encourage a broad range of services and programming for children aged 0-6 years and their families, based on the priorities of positive parenting, nutrition and physical health, literacy and learning and community capacity.
- Recognizing that parents are the first, most important and most lasting teachers in a child's life, coalition activities create opportunities for parents and children to participate in quality programming together, and offer supports to families.
- Healthy Child Manitoba supports regional parent child coalitions within geographic boundaries, based on the Regional Health Authority Boundaries and Winnipeg Community Areas.
- There are 26 funded parent child coalitions province-wide: 25 regional coalitions (12 regions outside Winnipeg and 13 community areas within Winnipeg) and 1 cultural organization that serves the needs of Francophone communities.
