## INTRODUCTION

This geochemical database has been developed for metallogenetic and environmental/epidemiological studies of Phanerozoic black shales in Manitoba. The metallogenetic potential for black shale has been demonstrated world wide as (i) host rocks to precious and base metal mineralization, (ii) aquitards/"cap-rocks" for focussing mineralizing fluids, and (iii) metal-enriched source rocks (Bloomstein and Clark, 1990; Colman et al., 1989). Locally, their importance to mineral deposits has been demonstrated at Black Island in Lake Winnipeg (Fedikow, Bamburak and Weitzel, 1995) where the metal-enriched character of Ordovician black shales was interpreted to represent a link between mobilization of metals from a gold-enriched sulphide facies iron formation and the subsequent precipitation of these metals as variably coloured, metal-rich crusts on the shales. The chemical characteristics of these unique lithologies will provide an opportunity to develop new metallogenetic concepts relevant to mineral exploration in Phanerozoic sequences.

This project will parallel and complement an environmental geochemistry study initiated by the Geological Survey of Canada and recently described by Dunn (1990). The GSC study documents the chemistry of Cretaceous shales subcropping beneath glacial deposits and seeks to address the apparent link between the high incidence of multiple sclerosis at Henribourg, Saskatchewan (Irvine, Schiefer and Hader, 1988, 1989) and the chemistry of soils and well waters. This association has been previously suggested by Gould and Warren (1980) and Hasanen, Kinnunen and Alhonen (1986).

This database has been established using a variety of analytical methods to generate a wide range of chemical elements with the aim of providing baseline geochemical data to as wide a user group as possible. The geochemical data has been linked to Manitoba Phanerozoic stratigraphy so that chemical characteristics of individual stratigraphic units can be ascertained and related to specific lithologies and lithologic associations.

## SAMPLE COLLECTION

The areal distribution of black shale sample sites is shown in Figure 1. Three types of samples were collected: (i) percussion chips from archived oil and gas well cuttings; (ii) diamond drill core from stratigraphic and mineral exploration drill core, and; (iii) outcrop chip samples. The archived well chips were sampled in approximately 15 m intervals to provide enough material for the various analytical methods. Questionable fragments that may have been introduced by the caving of the drill hole were

carefully removed by hand. Drill core was sampled by collecting 4 to 5 representative chips approximately 3 cm in core length. Representative outcrop samples comprise 2 to 3 chips of approximately 8 cm in diameter.

A brief description of lithology, colour, oxidation, identifiable mineralogy and other noteworthy features were documented from each sample and are presented in accompanying data files.

The distribution of black shale samples through the stratigraphic column is presented in Figure 2.

## SAMPLE ANALYSIS

A description of the analytical methods with the upper and lower limits of detection for elements determined for this database are presented with the analytical data; individual analytical methodologies (neutron activation and inductively coupled plasma-atomic emission spectrometry) are described in Table 1. Analyses that are below the lower limit of detection (LLD) have been replaced by values of one half the LLD. Geochemical data quality was monitored by replicate analysis of standards LKSD-2 and LKSD-4. Both standards were supplied by the Geological Survey of Canada.

**Table 1**  
**Descriptions for analytical methods**

**Activation Laboratories Ltd. (Ancaster, Ontario)**

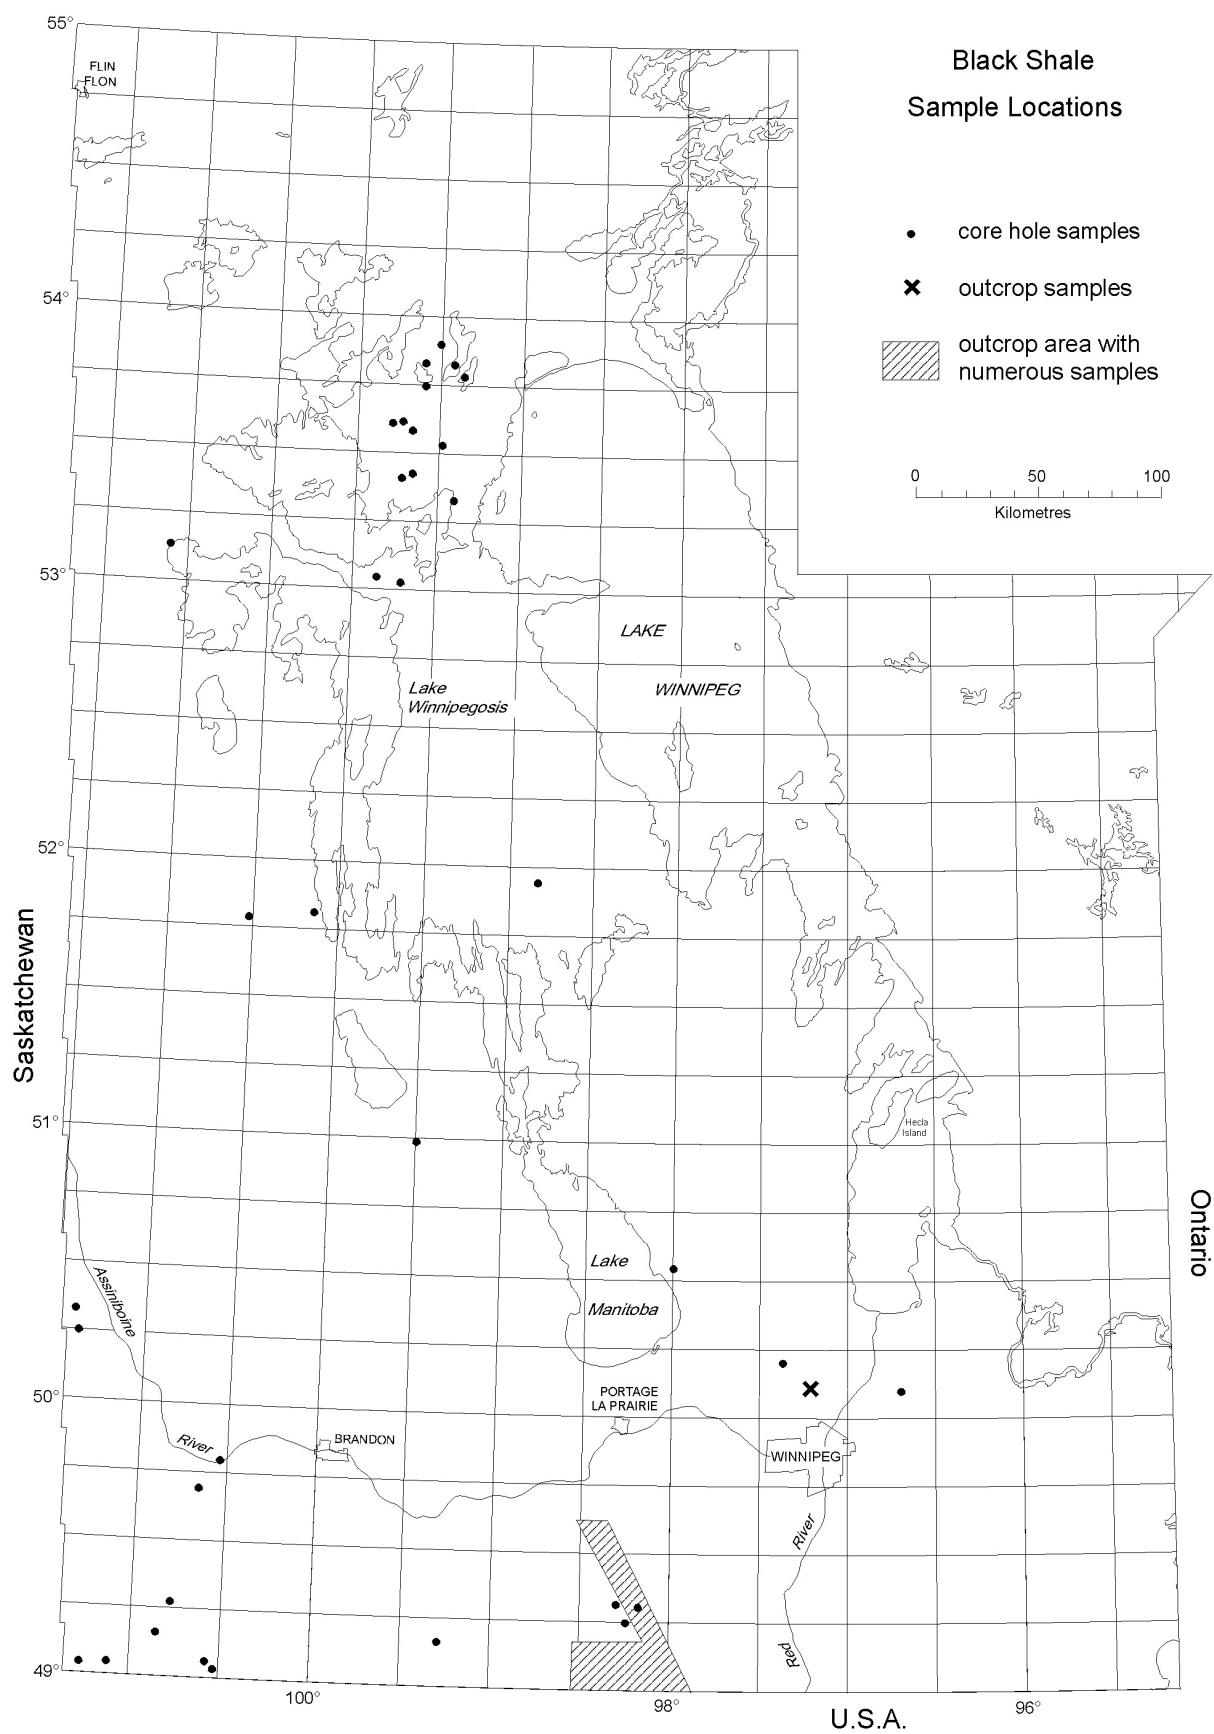

"Au + 47": combination of neutron activation (INAA) and 4 acid total digestion inductively coupled plasma-emission spectrometry (ICP-AES).

**Chemex Laboratories Ltd. (Vancouver, BC)**

"UT-10": for the analysis of Ag, As, Bi, Cd, Cu, Mo, Pb, Sb and Zn samples are dissolved using an HCl-KClO<sub>3</sub> digestion. Subsequently, all elements are extracted into an organic solvent (MIBK) using Aliquat-336 as a complexing agent. Mercury is determined using cold vapour atomic absorption spectroscopy after a nitric-aqua regia digestion. Owing to rapid saturation of the chemical extraction system this approach is applicable only to weakly mineralized samples.

**Hg:**

Hg is analyzed by digesting a 1 g sample with nitric acid for 1 hour, cooled and HCl is added to produce aqua regia. The solution is allowed to digest for one and a half hours then diluted to 25 ml with demineralized water and mixed. An aliquot is treated with stannous chloride to reduce the mercury. Resulting mercury is volatized by argon-purging and measured by atomic absorption spectrometry.

*Figure 1: Black shale core hole and outcrop sample locations.*

ERA	PERIOD	FORMATION	MEMBER	MAXIMUM THICKNESS (m)	BASIC LITHOLOGY
CENOZOIC	QUATER-NARY	(Recent)			Top soil, dune sands, lake clays, peat
		Glacial Drift		140	Clay, sand, gravel, boulders, till
	TERTIARY				
		Turtle Mountain	Peace Garden Goodlands	160	Shale, clay, sand, lignite
		Boissevain		45	Sand, sandstone, greenish grey
		Pierre Shale (First White Specks)	Coulter Odahah Millwood Pembina Gammon Ferruginous	400	Grey shales, non-calcareous, local ironstone, bentonitic, carbonaceous
		Niobrara		75	Grey speckled shale, calcareous, bentonitic
MESOZOIC	CRETACEOUS	Morden Shale (Second White Specks)	Assiniboine Keld Belle Fourche Shale Westgate Newcastle Skull Creek	55 45 80	Dark grey shale, non-calcareous, concretions, local sand and silt Grey shale with calcareous specks, bands of limestone and bentonite Dark grey shale, non-calcareous, silty, Newcastle (sand zone)-quartz sandstone
		Ashville			
		Swan River		150	Sandstone and sand, quartzose, pyritic shale, non-calcareous
		Waskada		60	Banded green shale and calcareous sandstone, bands of limestone, varicoloured shale
		Melita		145	
		Reston		45	Limestone, buff, and grey shales
		Upper	Evaporite	55	White anhydrite and/or gypsum and banded dolomite and shale
	TRIASSIC	Lower	Red Beds	45	Red shale to siltstone, dolomitic
PALEOZOIC	PERMIAN	St. Martin Complex		265(+)	Carbonate breccia, trachyanandesite (crypto-explosion structure?)
	PENNSYL-VANIAN	Charles		20	Massive anhydrite and dolomite
	MISSISSIPPIAN	Mission Canyon	MC-5 MC-4 MC-3 MC-2 MC-1	120	Light buff limestone, oolitic, fossiliferous, fragmental, cherty, bands of shale and anhydrite
			Flossie Lake Whitewater Lake Virden Scallion Daly	185	Limestone and argillaceous limestone, light brown and reddish mottled, zones of shaly, oolitic, crinoidal and cherty limestone
			Upper Middle Lower	20	Two black shale zones separated by siltstone
		Lodgepole			
		Bakken			
	Qu'Appelle Group	Three Forks		55	Red siltstone and shale, dolomitic
		Birdbear		40	Limestone and dolomite, yellow-grey, fossiliferous, porous, some anhydrite
		Duperow		120	Limestone and dolomite, argillaceous and anhydritic in places
		Souris River (First Red)		90	Cyclical shale, limestone and dolomite, anhydritic
		Dawson Bay (Second Red)		50	Limestone and dolomite, porous, anhydritic, local red and green shale
	DEVONIAN	Winnipegosis	Prairie	120	Halite, potash and anhydrite, interbedded dolomite
			Evap.	75	Dolomite, yellow brown, reeфy
					Limestone, fossiliferous, high-calcium
		Elk Point Group	Elm Point	12	Dolomite and shale, brick red
	SILURIAN	Interlake Group		110	Dolomite, yellow buff, fossiliferous, several argillaceous marker beds
			Stonewall	25	Dolomite, sparsely fossiliferous, t-marker defines Ordovician-Silurian boundary
		Stony Mountain	Williams Gunter	45	Dolomite, yellow buff
			Penitentiary		Dolomite, dusky yellow, fossiliferous, red shale, green fossiliferous limestone bands (Gunn)
			Gunn		
	ORDOVICIAN	Red River	Fort Garry Selkirk Cat Head Dog Head	170	Dolomitic limestone and dolomite, mottled (Tyndall Stone within Selkirk)
			?		
	CAMBRIAN	Winnipeg	Upper Unit	65	Green shale, waxy, interbedded sandstone
			Lower Unit		Sand, sandstone and quartzose
	PRECAMBRIAN	Deadwood		25	Black to green grey sand, waxy, glauconitic siltstone and shale
					Metamorphic and crystalline rock

Figure 2: Geological formations in Manitoban Phanerozoic rocks represented by black shale samples. The grey dot identifies the Formation/Member sampled.

Recommended geochemical values for these standards are presented with analytical results from this study. Analytical reproducibility was monitored by 29 duplicate pairs blindly inserted into the sample population.

Multiple analyses of the standards LKSD-2 and LKSD-4 by each of the three analytical methods utilized for this database indicate analyses are accurate for most elements when compared to provisional values based on total element contents (Lynch, 1990). UT-10/ICP-AES analyses of Sb and Zn tend to be somewhat low. Calcium analyses by ICP-AES are elevated over recommended values. Beryllium contents of the standards are mostly less than the lower limit of detection. Cadmium determinations by ICP-AES are slightly higher than recommended values, however, the provisional values are based on a concentrated HNO<sub>3</sub>-HCl partial dissolution and accordingly are probably not reflecting "total" amounts of Cd. Interestingly, Cd contents determined by UT-10/ICP-AES show excellent correlation with provisional partial determinations. INAA for Ag, Hg, Ir, Mo, Se, Sn, Sr, Ta and W are less than the lower limit of detection. Non-reproducible results were obtained for Ca, Co, Rb and Tb.

Analytical reproducibility was monitored by 29 duplicate pairs prepared as homogenized splits in the Geological Services Branch laboratory. Field replicates were not collected. Analytical reproducibility for elements determined by UT-10/ICP-AES and ICP-AES (four acid total digestion) are excellent. INAA of Au at <20 ppb tends to be erratic.

## DATA FILE ORGANIZATION

This database is organized on the basis of sample type (drill chip, drill core and outcrop) and analytical method (INAA, ICP-AES and "UT-10/ICP"). Standards and duplicates are also organized in this manner. Duplicate sample data are also presented as "averaged" data with the calculation of the arithmetic mean for two separate analyses. A stratigraphic column for the Phanerozoic sequences in Manitoba is also included as a "miscellaneous" file. The data files are organized as follows:

### Black Shale Percussion Drill Chips

**Analysis:** Description      **File Name:** BSChips.xls  
 Neutron Activation      BSChipNA.xls  
 ICP-AES      BSChipIC.xls  
 UT-10 (ICP-AES)      BSChipUT.xls

### Black Shale Drill Core

**Analysis:** Description      **File Name:** BSCore.xls  
 Neutron Activation      BSCoreNA.xls  
 ICP-AES      BSCoreIC.xls  
 UT-10 (ICP-AES)      BSCoreUT.xls

### Black Shale Outcrop Chips Arithmetic Mean

<b>Analysis:</b>	Description	<b>File Name:</b> BSCOC.xls
	Neutron Activation	BSOCNAM.xls
	ICP-AES	BSOCICM.xls
	UT-10 (ICP-AES)	BSOCUTM.xls

### Black Shale Outcrop Chips Duplicates

<b>Analysis:</b>	Description	<b>File Name:</b> BSCOC.xls
	Neutron Activation	BSOCNAD.xls
	ICP-AES	BSOCICD.xls
	UT-10 (ICP-AES)	BSOCUTD.xls

### Standards

<b>Analysis:</b>	Neutron Activation	<b>File Name:</b> NASTD.xls
	ICP-AES	ICPSTD.xls
	UT-10 (ICP-AES)	UTSTD.xls

### Miscellaneous Files

**Analysis:** Stratigraphic Column **File Name:** Formcode.txt

To facilitate data manipulation the files are presented as EXCEL 4 spreadsheets (XLS) and as comma delimited text files (CSV). Data are also provided in Appendices 1 to 19.

## ACKNOWLEDGEMENTS

This study was prompted by the preliminary black shale geochemical investigations undertaken by Erik Nielsen (Manitoba Energy and Mines, Geological Services Branch) involving the exploration of observed till geochemical patterns in the southwest area of the province and in the Manitoba Interlake. Doug Berk, Vio Varga, Gerry Benger and Rick Unruh are thanked for sample location and preparation. Bonnie Lenton is thanked for figure preparation.

Sample Number	Formation or Member	Formation Code	Comments
1	Boishevain	2070	light to dark grey shale/mudstone
2	Boishevain	2070	light to dark grey shale/mudstone
3	Pierre	2080	light to dark grey shale/mudstone
4	Pierre	2080	light to dark grey shale/mudstone
5	Pierre	2080	light to dark grey shale/mudstone
6	Niobrara	3050	light to dark grey shale/mudstone
7	Niobrara	3050	light to dark grey shale/mudstone
8	Morden	5670	light to dark grey shale/mudstone
9	Morden	5670	light to dark grey shale/mudstone
10	Keld	5800	light to dark grey shale/mudstone
11	Ashville	7950	light to dark grey shale/mudstone
12	Ashville	7950	light to dark grey shale/mudstone
13	Swan River	9315	light to dark grey shale/mudstone
14	Jurassic	20500	light to dark grey shale/mudstone
15	Jurassic	20500	light to dark grey shale/mudstone
16	Jurassic	20500	light to dark grey shale/mudstone
17	Jurassic	20500	light to dark grey shale/mudstone
18	Jurassic	20500	light to dark grey shale/mudstone
19	Jurassic	20500	light to dark grey shale/mudstone
20	Jurassic	20500	light to dark grey shale/mudstone
21	Pierre	2080	light grey shale; sulphur-yellow precipitate; minor granite
22	Pierre	2080	light grey shale; some light yellow precipitate; white precipitate @ 64.0m
23	Pierre	2080	light grey shale; minor specks of yellow precipitate
24	Pierre	2080	light grey to grey shale
25	Pierre	2080	light grey to grey shale; faint rusty Fe stain
26	Pierre	2080	light grey to grey shale
27	Pierre	2080	light grey to grey shale
28	Pierre	2080	grey shale
29	Pierre	2080	grey shale
30	Pierre	2080	grey shale
31	Pierre	2080	grey shale
32	Pierre	2080	grey shale
33	Pierre	2080	grey shale
34	Pierre	2080	light grey shale
35	Millwood	3010	light grey shale
36	Millwood	3010	light grey shale; minor dark grey shale material
37	Millwood	3010	light grey to grey shale; minor rusty stain/coating
38	Millwood	3010	light grey to grey shale; minor rusty stain/coating
39	Millwood	3010	grey shale; minor white precipitate; bentonitic (?)
40	Pembina	3020	grey shale; rusty precipitate; scattered white fragments; bentonitic
41	Pembina	3020	grey shale; rusty precipitate; scattered white fragments; bentonitic
42	Niobrara	3050	grey shale; minor gypsum? & white & yellow precipitate @ 368.8m
43	Niobrara	3050	grey shale; some calcitic fragments (?)
44	Niobrara	3050	grey shale; calcitic fragments
45	Niobrara	3050	grey shale
46	Morden	5670	grey to dark grey shale; abundant white crystals; speckled
47	Morden	5670	grey shale; abundant white crystals; fissile; platy; rusty stain
48	Assiniboine	5770	grey shale; massive; no white crystals
49	Keld	5800	dark grey shale
50	Belle Fourche	7970	dark grey shale
51	Belle Fourche	7970	dark grey shale; scattered white precipitate/crystals; scattered yellow brown precipitate/coating
52	Belle Fourche	7970	dark grey shale; scattered white crystals/precipitate
53	Belle Fourche	7970	dark grey shale; scattered white crystals; olive green precipitate on black shale 536.5m
54	Westgate	8000	dark grey shale; scattered white precipitate/crystals; scattered rusty stain
55	Ashville	7960	dark grey shale; scattered rusty stain; minor white precipitate
56	Swan River	9315	dark grey shale; scattered rusty stain/coating
57	Swan River	9315	light grey to grey shale; scattered quartzose sand
58	Swan River	9315	light grey to grey shale; abundant sand (well rounded)
59	Swan River	9315	light grey to grey shale; scattered white crystals

**Appendix 1 Continued**  
**Black Shale Drill Chip Samples**

Sample Number	Formation or Member	Formation Code	Comments
60	Swan River	9315	light grey to grey shale; sandy; rusty stain; white crystals; green yellow precipitate
61	Jurassic	20500	grey shale; brown precipitate/coating; scattered calcitic fragments (?)
62	Jurassic	20500	grey shale; minor sand
63	Jurassic	20500	grey shale; white crystals; brown precipitate; calcitic fragments; sandy
64	Jurassic	20500	grey shale; abundant white crystals; sandy
65	Jurassic	20500	grey shale; abundant white crystals; sandy
66	Jurassic	20500	grey shale; abundant white crystals; sandy
67	Jurassic	20500	grey shale; scattered white crystals
68	Jurassic	20500	grey shale; scattered white crystals; minor red shale; white calcitic fragments
69	Reston	22640	grey shale; scattered white crystals; minor red shale; white calcitic fragments
70	Reston	22640	grey shale; scattered white crystals; minor red shale; white calcitic fragments
71	Reston	22640	grey shale; abundant white chips (calcitic/gypsum?); red shale; white precipitate/crystals
72	Upper Amaranth	22655	grey shale; abundant gypsum fragments; white precipitate/coating
73	Upper Amaranth	22655	grey shale; abundant gypsum fragments; white precipitate/coating
74	Lower Amaranth	22670	grey shale; abundant gypsum fragments; white precipitate/coating
75	Lower Amaranth	22670	grey shale; scattered red shale
76	Lower Amaranth	22670	light grey shale; scattered red shale fragments
77	Pierre	2080	light grey shale; some rusty stain
78	Pierre	2080	light grey shale; some rusty stain
79	Pierre	2080	light grey shale; some rusty stain
80	Pierre	2080	light grey shale; some rusty stain
81	Pierre	2080	light grey shale; some rusty stain
82	Pierre	2080	light grey shale; scattered yellow brown stain/coating/precipitate; Fe stain
83	Pierre	2080	light grey shale; scattered yellow brown stain/coating/precipitate; Fe stain
84	Pierre	2080	light grey shale; minor white precipitate
85	Pierre	2080	light grey shale; brown rusty stain; Fe stain
86	Pierre	2080	light grey shale; minor Fe stain
87	Niobrara	3050	light grey shale; minor Fe stain
88	Niobrara	3050	light grey shale; minor brown rusty precipitate/coating
89	Niobrara	3050	light grey shale; dark black shale chips; white chips/precipitate; brown rusty precipitate
90	Niobrara	3050	medium to grey shale; abundant white fragments (calcitic?); rusty brown precipitate
91	Niobrara	3050	light grey to grey shale; minor white fragments/precipitate
92	Morden	5670	light grey to grey shale; minor white fragments/precipitate
93	Morden	5670	light grey to grey shale; minor rusty precipitate; white specks
94	Morden	5670	medium grey to grey shale; abundant white specks
95	Morden	5670	white speckled grey-medium grey shale
96	Morden	5670	white speckled grey-medium grey shale; less specks @ 408.4m
97	Keld	5800	light grey-medium grey shale; minor sulphur yellow/white precipitate
98	Favel	7950	light grey-medium grey shale; minor white and rusty precipitate
99	Ashville	7950	light grey-medium grey shale; white specks in black shale
100	Ashville	7950	light grey-medium grey shale; calcitic fragments; white specks; minor rusty precipitate
101	Ashville	7950	light grey-medium grey shale; rusty stain; minor white specks/precipitate
102	Ashville	7950	light grey-medium grey shale; rusty stain; minor white coating; black fragments
103	Ashville	7950	light grey-medium grey shale; rusty brown stain
104	Ashville	7950	grey shale; green and rusty brown precipitate; minor white fragments
105	Swan River	9315	light grey-medium grey shale; quartzose sand @ 548.6m
106	Jurassic	20500	silty shale; minor quartz sand infill; rusty stain; white precipitate
107	Jurassic	20500	silty shale; salt & pepper texture; white fragments; rusty stain
108	Jurassic	20500	silty shale; salt & pepper texture; white fragments; rusty stain
109	Jurassic	20500	silty shale; salt & pepper texture; white fragments; rusty stain
110	Jurassic	20500	silty shale; minor Fe stain; white fragments; red shale
111	Jurassic	20500	silty shale; red shale & white fragments; minor Fe stain
112	Reston	22640	silty shale; calcitic; minor red shale; beige fragments @ 716.3m
113	Reston	22640	silty shale; salt & pepper texture; calcitic.
114	Reston	22640	silty shale; calcitic
115	Reston	22640	silty shale; trace of gypsum?; calcitic.
116	Upper Amaranth	22655	silty shale; black to grey shale; minor white fragments
117	Upper Amaranth	22655	silty shale; salt and pepper texture; evaporite fragments; red shale
118	Upper Amaranth	22655	silty shale; medium grey shale; scattered evaporites; red, grey, olive green
119	Pierre	2080	brown grey shale/mudstone; minor white fragments

**Appendix 1 Continued**  
**Black Shale Drill Chip Samples**

Sample Number	Formation or Member	Formation Code	Comments
120	Pierre	2080	brown grey shale/mudstone; brown grey shale
121	Pierre	2080	brown grey shale/mudstone; brown grey shale
122	Pierre	2080	brown grey shale/mudstone; minor rusty stain; minor white; minor blue shale material
124	Niobrara	3050	grey brown shale
125	Niobrara	3050	grey brown shale; abundant white specks (swells)
126	Favel	5760	grey brown shale; less white specks @ 289.6m
127	Favel	5760	grey brown shale; olive green precipitate
128	Ashville	7950	grey shale; minor white precipitate/speccks
129	Ashville	7950	grey shale; white precipitate/coatings; brown/light yellow precipitate/coating
130	Ashville	7950	grey shale; olive green precipitate
131	Ashville	7950	grey shale; olive brown precipitate; rusty weathering
132	Ashville	7950	grey shale; olive brown and green precipitate; white fragments; rusty brown stain
133	Ashville	7950	grey shale; minor brown coating
134	Ashville	7950	grey shale; minor brown coating and white precipitate.
135	Swan River	9315	grey shale; minor rusty brown coating; no white
136	Swan River	9315	grey shale; minor white; rusty brown precipitate; carbonaceous fragments
137	Swan River	9315	grey shale; abundant rusty stain; white fragments with fibrous crystals
138	Jurassic	20500	grey shale; abundant red brown oxide; minor white
139	Jurassic	20500	grey shale; no red or white
140	Jurassic	20500	light grey to grey shale; minor white fragments/speccks
141	Jurassic	20500	grey shale; minor white fragments; no rusty brown stain
142	Jurassic	20500	grey shale; minor white fragments; no rusty brown stain
143	Jurassic	20500	grey shale; minor white precipitate; minor olive brown precipitate
144	L. Lodgepole	39757	grey shale; minor white precipitate; calcitic; minor red-orange
145	L. Lodgepole	39757	grey shale; scattered green white precipitate; abundant red-orange fragments
146	L. Lodgepole	39757	grey shale; rare orange pink fragments; minor white; rare brown
147	L. Lodgepole	39757	grey shale; scattered white; green/olive/white precipitate; no rusty stain
148	Bakken	40700	grey shale; abundant white precipitate; calcitic fragments; minor grey shale; abundant red
149	Three Forks	50600	grey shale; abundant red; white fragments/coatings
150	Birdbear	52800	grey shale; scattered white fragments/coating; red shale
151	Birdbear	52800	grey shale; abundant white fragments at base; calcitic; slight oily odor
152	Pierre	2080	grey shale; rusty red fragments
153	Pierre	2080	grey shale; rusty red fragments
154	Pierre	2080	grey shale; minor Fe stain
155	Pierre	2080	grey shale; dark black shale fragments
156	Pierre	2080	light grey shale; minor white fragments/speccks/precipitate; Fe stain
157	Pierre	2080	light grey shale; minor Fe stain; white precipitate
158	Pierre	2080	light grey shale; rare rusty stain
159	Pierre	2080	light grey shale; rare red brown fragments
160	Pierre	2080	light grey shale; rare nonmetallic crystals; minor white and green precipitate
161	Pierre	2080	light to medium grey shale; minor carbonaceous material; crystals as above
162	Millwood	3010	light grey to light brown shale; rusty stain; minor white fragments
163	Millwood	3010	light grey to light brown shale; minor white precipitate/speccks; red brown fragments
164	Pembina	3020	light grey to light brown shale; abundant white specks (esp. in 432.8m); minor brown stain
165	Pembina	3020	light grey shale; abundant white fragments and specks
166	Pembina	3020	light grey shale; scattered white fragments and specks
167	Niobrara	3050	light grey shale; minor white fragments
168	Niobrara	3050	brown grey shale; rare woody fragments; rare rusty stain; scattered white
169	Niobrara	3050	brown grey shale; minor Fe stain; minor white specks
170	Niobrara	3050	brown grey shale; minor brown stain; no white
171	Niobrara	3050	brown grey shale; abundant white specks/precipitate (@542.5-545.6); swelling
172	Niobrara	3050	black grey shale; abundant white specks/precipitate; swelling
173	Keld	5800	black grey shale; abundant white specks/precipitate; swelling
174	Favel	5760	grey brown shale; very minor white precipitate
175	Ashville	7950	grey brown shale; scattered white precipitate/speccks
176	Ashville	7950	dark brown grey shale; scattered white specks/precipitate; rare brown stain
177	Belle Fourche	7970	dark brown grey shale; some white precipitate; rusty stain
178	Ashville	7950	dark brown grey shale; scattered white precipitate/speccks
179	Ashville	7950	dark brown grey shale; minor white specks

**Appendix 1 Continued**  
**Black Shale Drill Chip Samples**

Sample Number	Formation or Member	Formation Code	Comments
180	Ashville	7950	brown to dark brown shale; minor white specks/precipitate
181	Ashville	7950	brown to medium brown shale; minor white precipitate/specks; rusty stain
182	Jurassic	20500	light to medium grey shale; abundant quartz sand; rare white precipitate; limonitic
183	Jurassic	20500	light to medium grey shale; scattered red-brown fragments; white and yellow precipitate
184	Jurassic	20500	light grey to grey shale; red brown fragments; abundant white precipitate
185	Jurassic	20500	light grey to grey shale; black fragments (coaly?); minor red brown fragments
186	Jurassic	20500	grey brown to grey shale; minor red brown fragments and white precipitate
187	Jurassic	20500	light to medium grey shale; abundant sand @ 804.7m; minor white fragments
188	Jurassic	20500	light grey to dark grey shale; scattered red brown fragments; rare white precipitate
189	Jurassic	20500	light grey to dark grey shale; abundant white fragments and precipitate; minor yellow brown fragments
190	Jurassic	20500	light grey to dark grey shale; clayey; abundant white calcitic fragments and precipitate; scattered sand grains
191	Jurassic	20500	light grey shale and clay; white precipitate
192	Jurassic	20500	grey shale; scattered white fragments and precipitate; scattered red brown fragments
193	Jurassic	20500	olive grey to grey shale; abundant white calcitic fragments and precipitate
194	Jurassic	20500	grey olive shale; abundant red brown fragments; scattered white fragments/precipitate
195	Jurassic	20500	grey shale; red brown fragments; minor white precipitate.
196	Reston	22640	light grey to dark grey shale; abundant red brown shale; white calcitic fragments
197	Reston	22640	light grey to dark grey shale; scattered red brown shale; scattered white fragments/precipitate
198	Reston	22640	grey black shale; white precipitate; orange red fragments; abundant white fragments
199	Amaranth	22650	grey black shale to olive brown; scattered white precipitate and calcitic fragments
200	Amaranth	22650	grey black shale; scattered white calcitic fragments and precipitate; rare red fragments
201	Amaranth	22650	grey to black shale; abundant red orange fragments at 1027.2m; scattered white
202	Amaranth	22650	black grey shale and red orange clay
203	Amaranth	22650	black grey shale and red orange clay; rare red; @ 1059.2m abundant white calcitic fragments
204	MC-3	38800	grey black shale with abundant white calcitic fragments; scattered red fragments
205	Pierre	2080	grey shale; very homogeneous; rare white and red
206	Pierre	2080	grey shale; rare white fragments
207	Pierre	2080	light grey homogeneous shale; rare white fragments
208	Pierre	2080	light grey homogeneous shale; scattered white fragments at 152.4m
209	Pierre	2080	light grey homogeneous shale; rare white precipitate/crystals?
210	Pierre	2080	light grey homogeneous shale
211	Pierre	2080	light grey homogeneous shale
212	Pierre	2080	light grey shale; homogeneous; rare red brown rusty stain
213	Pierre	2080	light grey/olive shale; homogeneous; scattered rusty stain
214	Pierre	2080	light grey shale; homogeneous; scattered rusty stain; rare white fragments
215	Pierre	2080	light grey shale; scattered white fragments; rare red stain
216	Pierre	2080	light grey shale; scattered white fragments/precipitate/crystals
217	Pierre	2080	light grey shale; scattered white fragments
218	Pierre	2080	light grey, homogeneous shale; rare white fragments
219	Pierre	2080	light grey shale; rare rusty stain
220	Pierre	2080	light grey to grey shale; rusty fragments; scattered white precipitate
221	Pierre	2080	light grey to grey shale; rusty fragments; minor white precipitate
222	Pierre	2080	light grey to grey shale; scattered brown rusty fragments
223	Pierre	2080	light grey to grey shale; scattered rusty fragments; rare white fragments/precipitate
224	Pierre	2080	light grey to grey shale; clayey at 259.1m; scattered rusty and white
225	Pierre	2080	light grey to grey shale; scattered rusty brown fragments; scattered white calcitic fragments
226	Pierre	2080	light grey to grey shale; scattered brown fragments; scattered white fragments (calcitic)
227	Pierre	2080	light grey to grey shale; scattered brown fragments; scattered white fragments (calcitic)
228	Pierre	2080	light grey to grey shale; scattered brown fragments; scattered white fragments (calcitic)
229	Pierre	2080	light grey to grey shale; clayey @ 329.2m; abundant rusty
230	Pierre	2080	medium grey to light grey shale; clayey; scattered white fragments & precipitate
231	Pierre	2080	light grey to dark grey shale; scattered white crystals and precipitate
232	Pierre	2080	grey to medium grey shale; dark black fragments; scattered white and rusty
233	Pierre	2080	grey to medium grey shale; slightly clayey; rare white precipitate
234	Pierre	2080	medium to dark grey shale/clay; abundant white (bentonite)
235	Niobrara	3050	medium to dark grey shale; clayey; abundant white fragments and rusty
236	Niobrara	3050	light to medium grey shale; scattered white precipitate and rusty
237	Niobrara	3050	light to medium grey shale; scattered rusty stain; clayey; rare white
238	Niobrara	3050	light to medium grey shale; rare white fragments and rusty fragments
239	Niobrara	3050	light to medium grey shale; clayey; abundant white precipitate and rusty precipitate

**Appendix 1 Continued**  
**Black Shale Drill Chip Samples**

Sample Number	Formation or Member	Formation Code	Comments
240	Niobrara	3050	light to medium grey shale; clayey; abundant white precipitate and rusty precipitate
241	Favel	5760	light to medium grey shale; rare black specks
242	Favel	5760	light grey to dark grey shale; abundant white and rare rusty; sandy?
243	Ashville	7950	light to dark grey shale; rare sand greens
244	Ashville	7950	light to dark grey shale; rare white fragments (calcitic)
245	Ashville	7950	light to dark grey shale; scattered white fragments
246	Ashville	7950	light to dark grey shale; scattered white fragments; scattered white coating
247	Ashville	7950	light to dark grey shale; minor white stain/coating; minor red/brown fragments
248	Ashville	7950	light to dark grey shale; white stain/coating; scattered yellow stain
249	Ashville	7950	light to dark grey shale; abundant white stain/coating; minor yellow brown stain
250	Swan River	9315	light to dark grey shale; scattered white coating/stain
251	Swan River	9315	light to dark grey shale; @ 673.6m quartz sand, fine grained
252	Jurassic	20500	medium grey shale; abundant white coating; scattered yellow stain; quartz sand
253	Jurassic	20500	medium to dark grey shale; white coated fragments; limonitic stain
254	Jurassic	20500	medium to dark grey shale; scattered white stain; calcitic fragments; limonitic
255	Jurassic	20500	light to dark grey shale; scattered white coating; red brown fragments
256	Jurassic	20500	light to medium grey shale; rare white stain; abundant brown shale
257	Jurassic	20500	light to medium grey shale; scattered white fragments; scattered red brown fragments
258	Jurassic	20500	light to medium grey shale; scattered white stain/coating
259	Jurassic	20500	light to medium grey shale; abundant white fragments (calcitic)
260	Jurassic	20500	light to medium grey shale; abundant white and yellow fragments
261	Reston	22640	medium to dark grey shale; abundant white coating and fragments
262	Reston	22640	light to dark grey shale; scattered white stain/coating
263	Amaranth	22650	light to dark grey shale; scattered white stain/fragments
264	Amaranth	22650	light to dark grey black shale; some white fragments/precipitate; minor red
265	Amaranth	22650	light to medium grey shale; minor white fragments
266	Lower Amaranth	22670	light to dark grey shale; scattered white fragments/shale; rusty red stain
267	Lower Amaranth	22670	light to dark grey shale; red grey shale; spongy texture; white stain
268	Charles	36010	red to grey shale; spongy; white/pink fragments; yellow/white stain
269	MC-2	39100	light to medium grey shale; abundant white fragments (calcitic); pink fragments
270	MC-1	39300	light to dark grey shale; abundant white/pink fragments (calcitic); white staining
271	MC-1	39300	light to medium grey shale; scattered white fragments; green fragments; red specks
272	MC-1	39300	light to medium dark grey shale; sandy @ 1072.9m; scattered white fragments (calcitic)
273	U. Lodgepole	39710	light to medium dark grey shale; black shale fragments; white fragments; sandy (fine grained)
274	U. Lodgepole	39710	light to dark grey shale; scattered white fragments; slight red fragments
275	U. Lodgepole	39710	light to dark grey shale; white fragments (calcitic); some white stain
276	U. Lodgepole	39710	light to medium grey shale; minor white/red fragments; white stain
277	U. Lodgepole	39710	light to dark grey shale; red shale
278	L. Lodgepole	39757	light to dark grey shale; white fragments (calcitic); darker in colour
279	L. Lodgepole	39757	light to dark grey shale; abundant white stain/fragments; more grey; minor red
280	L. Lodgepole	39757	medium to dark grey shale; minor red fragments
281	L. Lodgepole	39757	medium grey shale; some white stain
282	L. Lodgepole	39757	medium grey shale; olive stain; minor white fragments
283	L. Lodgepole	39757	medium grey shale; minor white fragments
284	Bakken	40700	light to medium grey shale; olive grey; abundant white fragments/stain
285	Three Forks	50600	grey to red shale; red brown; (no vials between 1286.3-1307.6m)
286	Birdbear	52800	grey shale; brown stain; minor white crust/thin film
287	Birdbear	52800	grey to black brown shale; very light in colour; minor white fragments
288	Duperow	53200	light to medium grey shale; minor olive colour
289	Duperow	53200	grey to light brown shale; fine grained sand; abundant white fragments; grey-beige

**Appendix 5 Continued**  
**Black Shale Drill Core**

Sample Number	Comments
D1	well indurated shale; fissile
D2	well indurated shale; fissile
D3	well indurated shale; fissile
D4	well indurated shale; fissile
D5	well indurated shale; fissile; 5GY4/1 between 11.4-11.6 m
D6	well indurated shale; fissile
D7	well indurated shale; fissile
D8	well indurated shale; fissile; some yellow precipitate
D9	well indurated shale; fissile
D10	well indurated shale; fissile
D11	well indurated shale; fissile
D12	well indurated shale; fissile
D13	well indurated shale; fissile; minor laminations of green to white precipitate; silty; minor pyrite(?)
D14	well indurated shale; fissile; minor green to white precipitate; siltstone to mudstone
D15	minor green to white precipitate; siltstone at top to shale at base; fissile
D16	shale; fissile; tiny black flecks (fish scales?); minor slickensides; green/white precipitate
D17	well indurated shale; fissile; minor yellow/green precipitate
D18	shale; fissile; sandy pods; sample of white fibrous material and yellow precipitate at 29.89 m
D19	shale; sandy pods & lenses; minor black pebbles; minor green/yellow precipitate
D20	well indurated shale; fissile; minor silty laminations
D21	coarse grained sandstone, 4-6 cm thick; massive sulphide sample(?)
D22	dark shale and silt; minor green (olive) yellow precipitate
D23	dark green (forest, 5GY5/2) precipitate; yellow green precipitate; black shale; silty
D24	siltstone. to shale; abundant green flecks and colouration - glauconite
D25	as above; rusty brown zone with black flecks; green/yellow precipitate; minor white precipitate
D26	as above; minor green/yellow precipitate; very poor recovery. - only 2 m of core; very clayey
D27	siltstone with clay; abundant woody fragments
D28	silty mudstone; abundant woody fragments (lignitic); minor yellow precipitate
D29	silty mudstone; abundant woody material; fissile
D30	silty mudstone; abundant woody material; minor yellow precipitate (small pebbles?)
D31	5-7 cm thick; black grey crystals; white acicular crystals, some yellow precipitate; slightly aquamarine
D32	siltstone; slightly laminated to massive
D33	siltstone; some slickensides?
D34	siltstone; olive-yellow tint
D35	siltstone; olive-yellow-green tint
D36	siltstone; slightly finer grained
D37	siltstone
D38	siltstone; @ 34.1 m - 1 cm bentonite bed (white to yellow)
D39	siltstone; grey
D40	silty mudstone; fissile
D41	silty mudstone; fissile to massive
D42	silty mudstone; yellow to olive brown precipitate, 2-4 cm thick
D42a	siltstone; yellow precipitate intervals @ 39.8, 40.1, 41.7, 41.8 m
D43	siltstone; some very dark grey intervals; Chondrites burrows
D43a	siltstone; yellow olive precipitate (along fractures?); @ 42.6, 42.9, 43.4, 43.6 m
D44	slightly silty mudstone; some slickensides
D44a	siltstone; yellow precipitate @ 46.1, 48.8 m
D45	silty mudstone; slightly laminated
D46	silty mudstone; yellow precipitate @ 42.4 m
D47	silty mudstone; abundant white specks
D48	silty mudstone; abundant white specks
D48a	silty mudstone; yellow olive brown precipitate @ 59.2 m; yellow precipitate (silty) @ 61.1 m
D49	black shale; massive; abundant shaly fragments (?)
D50	black shale; massive; abundant shaly fragments (?)
D51	black shale; massive; abundant shaly fragments (?)
D52	silty mudstone; massive
D53	lignitic shale; coaly
D54	mudstone; Chondrites burrows; pyrite nodules; yellow precipitate
D55	lignitic shale; coaly; brittle fracture; yellow brown coating

**Appendix 5 Continued**  
**Black Shale Drill Core**

Sample Number	Comments
D56	lignitic shale; coaly; brittle fracture; minor yellow brown coating
D57	silty mudstone; fissile to laminated; light grey coating/weathering; minor yellow precipitate
D58	silty mudstone; minor grey coating
D59	silty mudstone
D60	silty mudstone; abundant grey coating; yellow precipitate as beds; very clayey
D61	silty mudstone; fissile; laminated
D62	silty mudstone; fissile; laminated
D63	silty mudstone; slight light grey coating
D64	silty mudstone; slight light grey coating
D65	silty mudstone; slight light grey coating
D66	silty mudstone; minor Chondrites; scattered yellow precipitate as layers
D67	silty mudstone; minor yellow precipitate layers
D68	slightly silty mudstone; blocky texture; massive
D69	silty mudstone; blocky texture
D70	silty mudstone; massive
D71	silty mudstone; massive
D72	silty mudstone; massive
D73	silty mudstone; massive
D74	silty mudstone; massive
D75	silty mudstone; massive
D76	silty mudstone; 1 cm white to yellow acicular crystals (coating?)
D77	silty mudstone; minor yellow precipitate
D78	silty mudstone; fissile to laminated; white specks
D79	silty mudstone; fossiliferous layers; white specks
D80	silty mudstone; white specks
D81	silty mudstone; white specks
D82	silty mudstone; white specks
D83	silty mudstone; containing abundant calcareous laminations (white); @ 9.1 m white calcareous bed
D84	silty mudstone; with abundant calcareous laminations (white); @ 10.8 m, 2 cm yellow rusty precipitate
D85	silty mudstone; fossiliferous?; minor yellow green precipitate
D86	silty mudstone; abundant white calcareous laminations
D87	silty mudstone; abundant white calcareous laminations and specks
D88	silty mudstone; abundant white specks
D89	silty mudstone; abundant white specks
D90	silty mudstone; abundant white specks
D91	silty mudstone; scattered white specks; bentonitic?; scattered black glossy flecks; abundant yellow precipitate with bentonite
D92	silty mudstone.; no abundant bentonitic beds; one yellow precipitate bed
D93	silty mudstone; bentonitic at 18.5, 18.9, 19.9, 19.2, 19.5 m; minor yellow precipitate
D94	slightly silty shale/mudstone; massive; well indurated; minor olive brown precipitate
D95	silty mudstone; minor yellow precipitate as nodules; white flecks
D96	silty mudstone; massive; white calcareous laminations and specks
D97	silty mudstone; massive with white calcareous laminations and specks
D98	silty mudstone; minor olive brown precipitate
D99	silty mudstone; dark brown fossiliferous fragments
D100	silty mudstone
D101	silty mudstone; abundant white specks
D102	silty mudstone; scattered olive yellow precipitate
D103	silty mudstone; scattered olive yellow precipitate
D104	silty mudstone; scattered olive yellow precipitate
D105	silty mudstone; scattered white calcareous laminations
D106	silty mudstone; scattered white calcareous laminations
D107	silty mudstone; massive
D108	silty mudstone; massive
D109	silty mudstone; minor olive brown precipitate
D110	silty mudstone; minor olive brown precipitate
D111	silty mudstone; yellow olive brown precipitate along bedding planes
D112	silty mudstone; yellow brown precipitate
D113	silty shale; massive; some laminated beds of calcite; yellow brown coating in lower 0.3 m; abundant pyrite
D114	black shale; fissile; 10-15 cm beds may be burrowed? (3-4 mm); sharp upper contact

**Appendix 5 Continued**  
**Black Shale Drill Core**

Sample Number	Comments
D115	black shale; silty; white precipitate; minor pyrite; not well indurated
D116	brown to black clay; silty; abundant flecks of pyrite (<1 mm) crystals; minor white precipitate
D117	dark grey black to black silty clay; not well indurated; slight yellow oxide/stain; minor coal
D118	black to grey shale; slightly sandy; scattered woody fragments; minor white clay intervals
D119	black to grey shale; very dark black at base; slightly sandy/silty; white precipitate/fragments
D120	dark black silty clay to brown silty clay
D121	dark black, slightly silty clay; abundant coaly fragments; large pyrite nodules (1-3 cm); abundant pyrite flecks
D122	dark black, slightly silty clay; minor white beige interbeds; scattered woody fragments
D123	black coaly silt bed; pyretic (nodular with boxwork texture and disseminated)
D125	blue grey claystone; fissile
D126	brown siltstone; pyrite (nodules)
D127	large pyrite nodules; up to 3-4 cm in diameter
D128	red brown mineral; fine crystalline; <1 mm across; acts like a coating
D129	black coaly bed; light grey clay intervals; some quartz sand
D130	black coaly bed; red brown silt; some green grey interbeds
D131	black coaly bed; abundant interbeds of fine grained dark red silt/sand
88-11-96	shale
88-12-96	shale
88-16-96	siltstone to sandstone; shale
88-38-96	shaly siltstone
88-40-96	shaly sandstone
88-41-96	shaly siltstone
88-42-96	shale
88-43-96	shaly siltstone with some sand
88-44-96	shale with some sand
88-45-96	siltstone with sand
88-46-96	silty shale with some sand
88-47-96	sandstone
88-49-96	shale/mudstone
88-73-96	shale
88-74-96	mudstone
88-75-96	shale
88-85-96	mudstone
88-86-96	mudstone
88-87-96	mudstone
88-89-96	black shale
