

SPECIFICATIONS FOR BOULEVARD EARTH FILL

510. 1 SCOPE

The work shall consist of blading, filling, compacting and shaping the boulevard to the cross section as shown on the typical cross section.

510. 7 CONSTRUCTION METHODS

Upon completion of pavement and curb construction operations, the centre boulevard shall be bladed to a shape reasonably close to parallel to the finished cross-section shown on the typical cross-section, in accordance with these specifications and to the satisfaction of the Engineer.

The earth fill shall be obtained from locations designated in the Special Provisions.

510. 9 METHOD OF MEASUREMENT

Earth Fill shall be measured in its original position by taking cross-sections before the work has started and again after it has been completed, and the volume computed in cubic metres.

510. 11 BASIS OF PAYMENT

Earth Fill will be paid for at the unit bid price per cubic metre as set forth in the Contract, and it will be payment in full for excavating and loading earth fill, hauling it to the boulevard, depositing, spreading, compacting and blading it to the required cross-section and performing all other operations necessary or incidental thereto.
