

AN ORDER OF THE CLEAN ENVIRONMENT COMMISSION

UNDER THE CLEAN ENVIRONMENT ACT

RE: The Clean Environment Commission and Johnson Nut & Confection Company, applicant,

WHEREAS pursuant to the provisions of The Clean Environment Act, Johnson Nut & Confection Company, submitted an application to The Clean Environment Commission to prescribe limits in connection with the operation of a plant engaged in the processing of food products the said plant located at 500 Pandora Avenue West, in the Transcona industrial park, in the City of Winnipeg, Manitoba,

AND WHEREAS representations were made by persons who are or who are likely to be affected by an Order of the said Commission prescribing limits in connection with the said operation,

AND WHEREAS The Clean Environment Commission held a public hearing on the 29th day of July, 1974, in Building 2 of the Fort Osborne Complex at 139 Tuxedo Avenue in the City of Winnipeg, Manitoba,

AND WHEREAS The Clean Environment Commission considered the application on the 10th day of September, 1974,

IT IS HEREBY ORDERED THAT

- \* 1. The applicant shall ensure that on and after a date six months from the date of issuance of this Order at any point of impingement off the site of the said operation and in a residential area or an area zoned residential odour arising from the said operation is not detectable when the suspect air is diluted with one equal volume of odour-free air,
- 2. The applicant shall ensure that sufficient and adequate emission control equipment and facilities are installed, and that the said equipment and facilities are so operated and maintained as to ensure that on and after a date six months from the date of issuance of this Order, emissions from any stack or vent of the said plant meet the following requirements:

*assigned to air  
emission control  
- 20 / BAA  
2007/74*

2. cont'd. . . .

- (a) Particulate matter  
does not exceed 0.57 grams per standard cubic meter at 20 degrees Centigrade and 760 millimeters of mercury (corresponding to 0.25 grains per standard cubic foot at 68 degrees Fahrenheit and 30 inches of mercury) at the point of emission,
- (b) Odour  
is not detectable when a sample of the emission is diluted with 149 equal volumes of odour free air: the said sample being taken at the point of emission.

Order No. 405

Dated at the City of Winnipeg

this 30th day of October, 1974.

Chairman  
Clean Environment Commission

C-b-938

- \* Note with respect to odour as determined in ambient air off the site of the operation.
- 1. A single testing for the presence of detectable odour is deemed not conclusive unless confirmed by a second test made within the period of not less than 15 minutes and not more than 60 minutes after the taking of the first test.
- 2. Odour to be measured with a Scentometer by the Environmental Management Division of the Department of Mines, Resources and Environmental Management or by another agency authorized by the Minister of the said Department for this purpose.
