Subject: File No. 4320.00 - GFL 1090 Kenaston BLVD, Winnipeg updated 17Aug16
Attachments: Response to Inspection May 25 2016.pdf

Good morning Cory:

Further to my earlier correspondence, please find attached a letter dated 27 May 2016 entitled "*Amendment to 69 HW RR License for GFL Environmental Inc., Winnipeg Location.*"

The current application revision GFL is seeking is to direct discharge its treated effluent from the effluent storage tank within its Water Treatment Building to the City of Winnipeg Municipal system. Currently, GFL is trucking the effluent from the effluent tank in the Water Treatment Building to the City of Winnipeg Municipal System. This change will save GFL trucking cost in delivering the treated effluent to the Municipal Plant. GFL has attained price estimates from certified contractors in Winnipeg to complete the installation of a sewer connection from the Winnipeg main line to the GFL Water Treatment Building. Work will not commence on the sewer line construction until such time that we have received approval from Manitoba Conservation for the direct discharge of treated effluent.

The letter attached contains the following information:

- Process Treatment Descriptions
- Wastewater Sampling and Analysis
- Site layout and Wastewater Building Layout
- Illustrated Process Flow Diagram
- Layout and Elevation Drawings
- Cetco CE400 System Operation Manual
- City of Winnipeg letter dated 26 February 2016 – Results of Analysis

Please let me know if you require any further information regarding this minor amendment change.

Thanks and have a great day.
glen

Subject: Client File No. 4320.00 - Response to Inspection at GFL 1090 Kenaston BLVD, Winnipeg on May 10, 2016

Good morning Cory:

In response to your email below, I have been tasked with taking over the permit application and correspondence with Manitoba Conservation for the connection to the City of Winnipeg sewer system.

Currently GFL is treating incoming waste waters using a water treatment system and following treatment, storing the treated effluent in a tank prior to transportation to a City of Winnipeg Municipal Water Treatment Plant. Our proposed change/ revision would be to install a direct connection that would permit GFL to direct discharge from the treated effluent storage tank to the Municipal system.

I am not sure what correspondence you have been provided from GFL regarding this permit update, so I will be providing information that I have been given. If additional information is required, please let me know and I will strive to complete the application process this week.

Thanks in advance.

glen

Good Morning,

I have been assigned the review and response for your licence.

I am just wishing to clarify what the alteration you are seeking currently is the inclusion of the wastewater treatment system into your licence, and the official name change to the document.

It appears from the document of June 2, 2016, that you are also considering:

- a) installing a connection to the City of Winnipeg sewer, but at this time, it has not been finalized that you wish to proceed; and

b) installing a sludge treatment facility (either bins or a pad system), but it has not been finalized either.

Both a) and b) above would be considered minor alterations to your licence, as they would not significantly alter the potential environmental emissions from the Development. Please submit additional information regarding the design, potential emissions and activities if you wish to proceed with these alterations.

Regards,

Cory Switzer, P.Eng.
