PUBLIC NOTICE

Open House for the Reed Copper Project

Hudbay will be hosting an Open House in Flin Flon to discuss the Reed Copper Project.

Location – Victoria Inn, Northern Room

Monday, November 26, 2012

From 7 p.m. to 9 p.m.

The Open House is part of the public engagement process for the environmental assessment of the Reed Copper Project, a proposed 1,300 tonne per day copper mine located between Flin

Flon and Snow Lake. Representatives from Hudbay and AECOM Canada Ltd. will be on hand to present the project, receive comments, and answer questions regarding the project.

If you are unable to attend the Open House, your questions and comments can be directed by email to

steph.west@hudsonbayminerals.com.

Last year the Winkler Flyers had a fundraiser hockey game, where a group of local hockey players played a group of Montreal Canadian Old timers. I was lucky enough to get invited to the reception and dinner after the game with all the players. Just happened to have my camera with me and got a few photos of me with some of Montreal's finest. Would like to be gearing up

to watch the Blue Bombers win the Grey Cup but that didn't pan out the way I wanted... but at least I won't have to listen to my Rough Rider friends brag about Saskatchewan winning, so that is good. Hopefully things will turn around next year, in the new stadium. Well that is it for now. Until next time... keep your head up and your stick on the ice.
Darryl

The truth is everybody is going to hurt you... you just gotta find the ones worth suffering for. ~ Bob Marley

PUBLIC MEETING

Help Shape Your New Regional Health Authority

The Manitoba government has reduced the number of regional health authorities (RHAs) as part of a plan to streamline administration and protect front-line health care. To ensure your new RHA is responsive to your community's needs, the Manitoba government is creating new Local Health Involvement Groups (LHIGs).

Ensure Your Community Has a Voice in Health Care
The Manitoba government and your RHA want to hear your suggestions about how the new Local Health Involvement Groups should work.

You can share your ideas online or attend a local meeting to discuss how the new Local Health Involvement Groups can give your family and community a stronger voice and partnership in local health delivery.

Share your views online at www.manitoba.ca/health/rha or register to attend a meeting in your area.

• **Snow Lake – Thursday, November 29, 7:00 p.m.**
Lawrie Marsh Community Hall, 200 Cherry Avenue

If you would like to attend this meeting, please register by e-mailing consultation@nrha.ca or call 1-888-340-6742.

Disability supports are available upon request in advance.

Here we are half way through November and Staback's Leafs haven't lost a game yet! Just doesn't seem right having no NHL to watch. I'm getting tired of watching TV Doctor and cop shows with my wife. Call me stupid, but I cannot understand what the two sides are fighting about. I pay \$400 a year to play hockey twice a week, and I'm not sure how long I would stay away from the rink if someone wanted to pay me millions of dollars to play. Enough about millionaires fighting billionaires over pennies; what else can I write about?

My father fell and broke his hip, so my sister Mary Ann 'The Rock' came down to hold my hand and comfort me while he had surgery. I really enjoyed her company and I know she would have preferred to be back in Snow Lake watching my niece Sara and her teammates kick some butt as they fought their way to the Zone finals in volley ball. We didn't need to be there for the finals against Churchill, as Mary Ann

got a point by point text on her phone as they downed the powerful Churchill team and won a berth in the provincials. If my sources are right, the provincials are to be held in St. Jean which is about 45 minutes from my house. You can bet I'll be there.

Not much else to report on. The nice thing about living close to your parents is that you get lots of company. All my family made it here for a bit this summer. Lucky for me, not all at the same time; however, I managed to get beat at golf by all three of my brothers. In my defense every one of them has new clubs, so that is my excuse. My brothers Dave, Bob and I spent a week in Fort Myers, Florida (at my nephews house) on the golf course, so we managed four or five games. Yes, I lost, but when I get old like them I hope some young guy lets me win a game or two. While there we managed to see a Red Sox game, a Florida Everblades hockey game and a Winnipeg Jet/Tampa Lightning game. Hope to make it down there again this year.

HUDBAY

PUBLIC NOTICE

Open House for the Reed Copper Project

Hudbay will be hosting an Open House in Flin Flon to discuss the Reed Copper Project.

Location – Victoria Inn, Northern Room
Monday, November 26, 2012

Somia Sadiq – Lead Assessor

Forward Looking Information

- This presentation contains “forward-looking statements” and “forward-looking information” (collectively, “forward-looking information”) within the meaning of applicable Canadian and United States securities legislation, including, but not limited to, Hudbay’s plans with respect to the development of its Lalor and Reed projects. All information contained in this presentation, other than statements of current and historical fact, is forward-looking information. Often, but not always, forward-looking information can be identified by the use of words such as “plans”, “expects”, “budget”, “guidance”, “scheduled”, “estimates”, “forecasts”, “strategy”, “target”, “intends”, “objective”, “goal”, “understands”, “anticipates” and “believes” (and variations of these or similar words) and statements that certain actions, events or results “may”, “could”, “would”, “should”, “might” “occur” or “be achieved” or “will be taken” (and variations of these or similar expressions). All of the forward-looking information in this presentation is qualified by this cautionary statement.
- Forward-looking information is not, and cannot be, a guarantee of future results or events. Forward-looking information is based on, among other things, opinions, assumptions, estimates and analyses that, while considered reasonable by Hudbay at the date the forward-looking information is provided, inherently are subject to significant risks, uncertainties, contingencies and other factors that may cause actual results and events to be materially different from those expressed or implied by the forward-looking information.
- The material factors or assumptions that were applied in drawing conclusions or making forecasts or projections set out in the forward looking information include, but are not limited to:
 - the accuracy of geological, mining and metallurgical estimates;
 - the costs of development;
 - no significant unanticipated operational or technical difficulties;
 - no significant unanticipated events relating to regulatory, environmental, health and safety matters; and
 - no significant and continuing adverse changes in general economic conditions.
- The risks, uncertainties, contingencies and other factors that may cause actual results to differ materially from those expressed or implied by the forward-looking information may include, but are not limited to, risks generally associated with the mining industry, such as economic factors (including future commodity prices, currency fluctuations and energy prices), operational risks and hazards, including unanticipated environmental, industrial and geological events and developments and the inability to insure against all risks, failure of plant, equipment, processes, transportation and other infrastructure to operate as anticipated, compliance with government and environmental regulations, dependence on key personnel and employee relations, uncertainties related to the geology, continuity, grade and estimates of mineral reserves and resources and the potential for variations in grade and recovery rates, uncertain costs of reclamation activities, as well as the risks discussed under the heading “Risk Factors” in our most recent Annual Information Form, Form 40-F and Management’s Discussion and Analysis for the three and six months ended June 30, 2012.
- Should one or more risk, uncertainty, contingency or other factor materialize or should any factor or assumption prove incorrect, actual results could vary materially from those expressed or implied in the forward-looking information. Accordingly, you should not place undue reliance on forward-looking information. Hudbay does not assume any obligation to update or revise any forward-looking information after the date of this presentation or to explain any material difference between subsequent actual events and any forward-looking information, except as required by applicable law.

Purpose

- Present concept for planned Reed Mine and information about the Environmental Assessment
- Undertake public consultation which is an important step in the Environmental Assessment process
- Gain insight into public concerns as a result of your comments

Reed Copper AEP

Brief History of Hudbay in Flin Flon Area

- Flin Flon mining camp started in 1915
- Hudbay has been operating in the Flin Flon area since the 1920's

Brief History of Hudbay in the Snow Lake Area

- Hudbay has operated mines in the Chisel Basin since the late 1950's
- Chisel Lake Mine, opened in 1958, was the first HBMS mine in the region
- Stall Lake Concentrator and Anderson Tailings Impoundment Area (TIA) opened in 1979. Several mines were in operation in the region at this time

Town of Snow Lake (Circa 1950's)

- Between 1998 and 2000, a decline ramp was driven from the bottom of the Photo Lake Mine to the current Chisel North Mine
- Chisel North ceased ore extraction in Fall 2012. Infrastructure will continue in operation to support the Lalor Projects

Chisel North Mine
