SUBJECT: Al Meisner Ltd. – Information for Public Registries

Tania,

Please find attached the TAC correspondence related to the Al Meisner Ltd - concrete batch plant file (5744.00) for distribution to the public registries. The documents included are:

- December 15, 2014 a memo from Environmental Compliance and Enforcement, 1 page
- December 12, 2014 an email from Prashanna Vivekananda, 1 page
- December 11, 2014 a memo from Muntaseer Ibn Azkar, 1 page
- December 11, 2014 an email from James Stibbard, 1 page
- December 11, 2014 email from Winifred Frias, 1 page
- December 1, 2014 email from Cheryl Kubish, 1 page
- November 19, 2014 an email from Brian Wilson, 1 page
- November 14, 2014 letter from Ryan Coulter, 1 page
- November 12, 2014 email from Jason Kelly, 1 page
- November 12, 2014 email from Dan Roberts with attachment, 3 pages
- November 12, 2014 email from Keith Lowdon, 1 page

13 pages total

Thank you.

Eshetu Beshada, Ph.D., P. Eng.

Memorandum

DATE: December 15, 2014

TO: Eshetu Beshada Environmental Approvals Conservation and Water Stewardship 160-123 Main Street (Box 80) Winnipeg MB R3C 1A5 FROM: Environmental Compliance and Enforcement Conservation and Water Stewardship Box 4000, Hwy 502 Lac du Bonnet MB R0E 1A0

SUBJECT: File: 5744.00 Al Meisner Concrete Plant Environment Act Proposal (EAP)

Environmental Compliance and Enforcement Branch (Eastern Region) submits the following comments re: the above EAP:

- Section 6.1 discusses various controls for dust emissions. How will the "visual opacity observation" training be delivered to plant employees i.e. will formal training be provided, and by whom?
- Section 6.1 indicates that liquid from settling basins will be taken to a pollution treatment centre for proper disposal. Can the proponent provide details regarding the pollution treatment centre i.e. what type/name of the facility? Does the proponent have a current arrangement with such a pollution treatment centre?
- Section 7.0 references a settling basin that will be used for the collection of washout water, and that
 the basin is excavated into clay fill. Can the proponent provide additional information regarding the
 clay fill such as thickness and hydraulic conductivity, and verify that the clay fill is adequate for the
 protection of groundwater from harmful constituents in the washout water?

Air Quality–Environmental Programs

& Strategies

Conservation and Water Stewardship

1007 Century Street, Winnipeg

SUBJECT: Al Meisner Ltd. – Concrete Batch Plant (File 5730.00)

Air Quality Section has reviewed the above proposal and provides the following comments:

- It is expected that there will be no significant impact on air quality provided that the plant is equipped with dust collection system (e.g., bag house) to prevent the release of dust into the atmosphere.
- Also provided that other dust control measures (e.g., watering, sweeping etc.) outlined in the Best Environmental Management Practices for Redi-Mix Concete Plants prepared by the Manitoba Heavy Construction Association are followed appropriately.
- Air Quality Section suggests that the EA Clause regarding noise nuisance be included.
