Requests for Emergency Winter Manure Application in 2019

After enduring the second wettest September on record in Manitoba, the department recognizes the challenges the livestock industry is currently facing regarding manure management. If you are facing a risk of manure breaching your storage facilities, you can apply for emergency authorization to apply manure to land after November 10th. Requests will be reviewed and approved within 24 hours.

The following information is required to process your request:

- Livestock operation information;
- Legal location of proposed spread field(s);
- Proposed volume and rate of manure to be applied;
- Proposed manure application date(s) – application period 28 days from date of issuance;
- Soil nutrient levels:
  a. Soil tests; or
  b. Estimates by indicating levels (low, medium, or high) and provide rational such as previous soil test(s), crop type, recent yield and past fertilizer application rates.
- Description of risk mitigation measures in place to mitigate escape of manure from field.

Submit the Request or Inquire by contacting:
