

## Regulation **Update**

### *Change to the trade of Partsperson:*

*On November 8, 2008, the Government of Manitoba registered a revised regulation for the trade of Partsperson.*

#### **Removal of Definition**

The definition of 'Parts' was removed from the regulation as it was not exhaustive and therefore seen to be restrictive to those practising in the trade. The former definition of parts was as follows:

***"parts" means any part, assembly or accessory pertaining to:***

- a.) Automobiles, trucks, buses and motorcycles;
- b.) Aviation;
- c.) Heavy duty vehicles and equipment;
- d.) Agricultural and industrial equipment;
- e.) Turf and outdoor power equipment;
- f.) Marine equipment and recreational vehicles and equipment; and
- g.) Electronics used in the mechanical and mechanical services industries.'

The removal of the definition of the term 'parts' will introduce flexibility into the trade and will allow for the expansion of the scope of the trade as the industry evolves.
