

Regulation Update

Changes to the Sprinkler System Installer Trade

Effective February 6, 2008, a revised regulation for the compulsory certification trade of Sprinkler System Installer was registered by the Government of Manitoba, which introduced one significant change to the training requirements.

For Employers

Work experience is the most significant component of apprenticeship training. Each apprentice must have on-site access to a certified journeyperson to receive the supervision and guidance necessary to perform the tasks of the trade safely and efficiently. As stated under the General Regulation, an employer must maintain a 1:1 ratio of one certified journeyperson to one apprentice on-site, ensuring the apprentice is directly supervised by a certified journeyperson. If an adjustment beyond the one to one ratio is required, a Request to Change Apprentice to Journeyperson Training Ratio Application can be made to the Apprenticeship Branch and approval may be granted on a case-by-case basis.

For more information contact the Apprenticeship Branch closest to you, or visit our website.
