

CONGREGATE LIVING FACILITIES

Manitoba will be prioritizing and providing immunizations to residents of hundreds of congregate living facilities. There are a large number of small group care homes that are not included in this public list. The Vaccine Implementation Task Force is working with Manitoba Families to develop an appropriate plan to reach residents of these smaller facilities.

A focused immunization team may not be suitable for all congregate living facilities, particularly those with a very small number of residents. However, the province will work with regional health authorities and the sites to identify alternatives, so eligible and consenting residents can be immunized.

If a congregate living facility is not included in the listing below and you have questions about whether it should be included, please contact the Vaccine Implementation Task Force at vitf@gov.mb.ca.
