MANITOBA

2016/17 Third Quarter Report

Honourable Cameron Friesen Minister of Finance

SUMMARY

Budget 2016 provided the financial overview of the Government Reporting Entity (GRE), which includes core government, government business enterprises (such as Manitoba Hydro and Manitoba Public Insurance), and other government organizations (such as health authorities, social service authorities and school divisions).

Manitoba's summary budget aligns with the accounting standards set by the Public Sector Accounting Board (PSAB) and fully reflects Generally Accepted Accounting Principles (GAAP). The financial information in this

report is presented in the same format as the budget.

The summary forecast for fiscal year 2016/17 is a net loss of \$872 million, an improvement of \$39 million from the net loss of \$911 million included in Budget 2016. The variance is primarily related to increases in Income Taxes and Fees and Other Revenue, offset by an increase in debt servicing costs partly as a result of increased interest rates.

GOVERNMENT REPORTING ENTITY

lillions of Dollars 2016/17 Summary					
UNAUDITED

NET INCOME (LOSS)	(872)	(911)	39		

- 1. Budget figures are adjusted to include allocations from Enabling Appropriations.
- 2. Other Taxes and Education expenditures reflect offsetting increases of \$260 million in revenue and expenditures due to restatement of the Education Property Tax Credit to correct an accounting error in deriving the budgeted amounts, resulting in no effect on the net loss.

CORE GOVERNMENT OUTLOOK

The core government outlook provides information on the core government activities – the revenue and expenditure of government departments that are under the direct control of the Legislative Assembly. These revenues and expenditures reflect the day-to-day decisions that ultimately determine the success of the government strategies, plans and programs.

The core government forecast for fiscal year 2016/17 is a net loss of \$800 million, an improvement of \$90 million from the net loss of \$890 million included in Budget 2016, primarily as a result of higher revenue from Income Taxes.

Expenditure increases in Families are primarily due to pressures in Employment, Income and Rental Assistance programs.

As part of the fiscal performance and health sustainability reviews currently underway, program expenditures throughout government continue to be assessed for opportunities to reduce the growth of core government spending and improve the effectiveness with which government delivers results for Manitobans. Results of these reviews will inform Budget 2017.

^{1.} Budget figures are adjusted to include allocations from Enabling Appropriations.

QUARTERLY FINANCIAL RESULTS

The unaudited net result of the core government for the first nine months of the fiscal year is a loss of \$476 million.

The nine-month revenue variance of \$15 million reflects higher than anticipated Fees and Other Revenue over this period.

The nine-month expenditure variance of \$(42) million is the result of timing of expenditures in various departments.

The nine-month net result of \$(476) million represents a variance of \$(208) million from the prior year. Revenue increased \$256

million year-over-year, offset by an increase in expenditures of \$464 million.

The year-over-year increase in revenue is primarily due to increases in Income Taxes and Federal Transfers.

The year-over-year increase in expenditures reflects increased spending in 2016/17 related to programming and services within the Health, Education and Families sectors offset by reductions in the Community, Economic and Resource Development sector.

STRATEGIC INFRASTRUCTURE INVESTMENT

The Manitoba government is committed to spending at least \$1 billion on strategic infrastructure in 2016/17 - roads and bridges, flood protection, hospitals, schools, universities and colleges, as well as municipal projects and other infrastructure.

As at the third quarter, strategic infrastructure investment is forecast to reach almost \$1.7 billion in 2016/17.

It is important to ensure that investment decisions are financially sustainable over the long term and are assessed to provide the best value for money.

In order to ensure value for money while meeting government's commitments, all infrastructure investments continue to be scrutinized.

BORROWINGS AND SUMMARY NET DEBT

At the end of the third quarter, Manitoba's borrowing requirement has been revised to \$5.6 billion, a reduction of \$0.9 billion from Budget 2016, primarily due to reduced requirements for Manitoba Hydro, health facilities, capital and general purpose borrowings.

Borrowings are used to finance capital related projects, and to finance the expenditures of priority government services in excess of generated income. While these investments underpin and support Manitoba's economic performance, Manitoba's Government has committed to reduce the reliance on borrowings to ensure that the use of the debt is within reasonable and predictable limits.

Net debt to GDP is currently forecast at 34.5% compared to 33.8% included in Budget 2016.

ECONOMIC REVIEW AND OUTLOOK

Overview

Manitoba's economic growth in 2016 is estimated to be 1.4%, which is third among provinces and matching Canada.

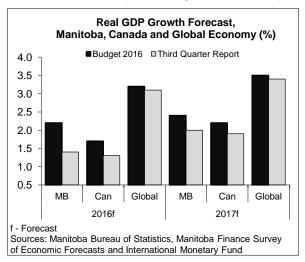

Nominal GDP, the broadest measure of the tax base, increased by 2.0% in 2016.

According to the latest Finance survey of private sector economists, real GDP growth in Manitoba is expected to improve to 2.0% in 2017. Nominal GDP growth is expected to improve to 3.8% in 2017.

The survey ranks Manitoba's expected real GDP growth rate in 2017, third highest among provinces, reflecting Manitoba's industrial diversity and its broad and balanced export market.

Canadian economic growth is expected to remain well below its historical average with 1.9% real GDP growth anticipated in 2017.

The moderation in the near-term outlook draws attention to some of the inherent downside risks that are restraining a sustained recovery for the global economy.

The International Monetary Fund (IMF) highlights high and growing public and private debt levels, a slow job creation rate, relatively

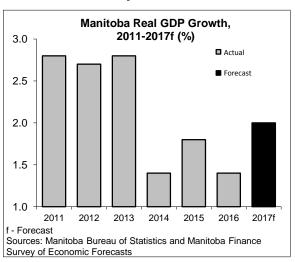

high unemployment, stagnant household income growth and low private sector capital investments as factors restraining global growth momentum.

In addition, uncertainties regarding which election promises will be enacted by the new U.S. administration pose both strong upside and downside risks to global growth, as the U.S. economy is the world's largest.

Currently, the IMF is expecting global economic growth to marginally slow to 3.1% in 2016 from 3.2% in 2015. Six G7 nations, including the U.S., are expected to post growth below 2.0% in 2016.

Global growth is forecast to pick up in 2017 to 3.4%, with the U.S. economy leading advanced economies at 2.5%.

Manitoba Economy

The Manitoba economy has remained resilient in the years following the sharp decline in most primary commodity prices. Annual real GDP growth in the province averaged 1.5% in the past three years, the slowest three year pace since 2003, but was relatively strong compared to other provinces.

Demand conditions in Manitoba are improving with manufacturing sales increasing in 2016 after declining in 2015. A large increase in the value of building permits

issued in the province has reversed the slide in non-residential capital spending that was precipitated by the completion of several major projects.

Domestic demand is strong with a record gain in population over a 12 month period ending in July 2016. Retail sales strengthened significantly in 2016, increasing by 4.5%, the strongest growth since 2010.

Manitoba's Key Economic Indicators

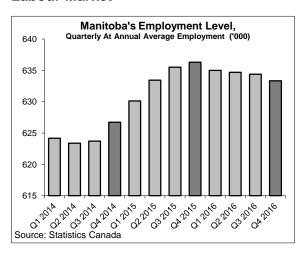

The annual and quarterly economic statistics in the following section are on a calendar year basis.

Inflation Rate

Manitoba's inflation rate averaged 1.3% in 2016, up marginally from 1.2% in 2015.

In 2016, clothing and footwear, food, and health and personal care prices increased below the average rate, while alcohol and tobacco, transportation, shelter, and household operations prices increased above the average rate.

Labour Market

After gaining almost 13,000 jobs from mid-2014 to the end of 2015, employment levels in Manitoba have slowly declined by 2,600 jobs in the last year. On an annual basis, employment declined by 0.4% in 2016. Manitoba's employment growth in 2016 was fifth best among provinces and followed a sharp 1.5% increase in 2015.

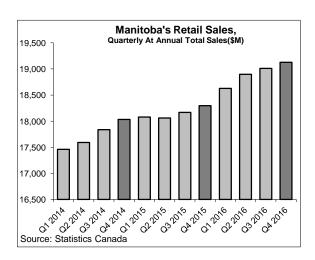

Full-time employment declined by 0.8% in 2016 and part-time employment increased by 1.3%. The labour force increased to an all-time high of 674,900, which is a 0.1% gain compared to 2015.

Manitoba's unemployment rate averaged 6.1% in 2016, the second lowest among provinces and below Canada's unemployment rate of 7.0%.

Labour Income has increased by 2.0% in 2016, below the 3.3% growth in 2015 and below the 2.5% increase in Canada.

Average weekly earnings in Manitoba were up 1.0% in 2016, sixth among provinces and above Canada's gain of 0.5%.

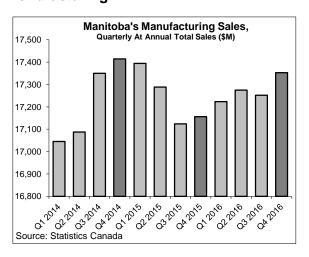

Retail Sales

Strong population growth continues to buoy retail activity in Manitoba. In 2016, retail sales increased by 4.5% to a record \$19.1 billion. All retail merchant categories increased in 2016. Three of the largest categories, motor vehicle and parts dealers (5.5%), food and beverage stores (2.1%) and general merchandise stores (5.2%) reported solid gains.

With fuel prices remaining relatively stable, gasoline station retail sales have improved after declining sharply in 2014 and 2015.

Manufacturing

In 2015, Manitoba manufacturing sales were impacted by the sharp drop in commodity prices and the corresponding drop in demand for machinery and equipment, and fabricated metals. Total sales fell by 1.5% in 2015, the first decline since 2010.

Manufacturing sales began rebounding in the second half of 2015 and increased by 1.3% in 2016. In 2016, there was a broad-based increase in sales among industries. Four of the seven industrial sectors reported increases in sales.

Wood products, printing, processed food, transportation equipment and fabricated metals led growth in 2016. Sales of chemicals, and machinery and equipment declined.

Capital Investment

With the completion of several major projects, capital investment in construction of non-residential buildings declined from late 2015 and through the first half of 2016.

Although annual spending on non-residential buildings rose later in 2016, due to the decline in the first half of the year, total

spending in 2016 fell by 7.4%. Industrial sector non-residential investment spending increased by 26.4%, while commercial sector spending and institutional and governmental investments decreased during the same period.

Capital spending on non-residential buildings in Manitoba is gradually picking up as construction of the \$400 million True North Square, a mixed use development complex in downtown Winnipeg, and other commercial building projects progress. Since the second quarter of 2016, total capital spending has increased by 6.3%.

This rebound is also evident in the value of non-residential building permits. In 2016, the value of non-residential building permits issued in Manitoba increased by 28.2%.

Housing Market

Construction of new residential properties in Manitoba has stabilized after a record setting pace in 2013 and 2014 that was mostly driven by strong demand, low vacancy rates and attractive mortgage rates.

Showing signs of a balance in supply and demand for new housing units, the number of starts for single detached properties increased in 2016 for the first time since 2012. Of the total housing starts in the province, over half were higher value-added single detached properties.

Housing starts for all three categories of multiple units combined (semi-detached, row housing and apartments) declined to 2,614 units in 2016 from 3,176 units in 2015.

International Merchandise Exports

Overall international merchandise exports from Manitoba declined by 2.1% in 2016. Exports to the U.S. declined by 3.8% while non-U.S. exports increased by 1.9%.

The decline in exports is due to a drop in sales from Manitoba's primary industries. Total agricultural exports declined by 0.6%, and exports from mining, quarrying and oil extraction fell by 60.0%.

Supported by shipments of processed food, transportation equipment, and wood products, exports of manufactured goods increased by 1.2% in 2016.

Among non-U.S. markets, a 1.5% decline in exports to China was offset by increases in exports to Japan, Mexico and South Korea.

Agriculture

Production estimates from Statistics Canada indicate that 2016 was another high volume production year for Manitoba grains and oilseeds. Although untimely precipitation during the growing and harvest periods affected the quality of some cereal crops, overall production was high compared to the 10 year historical average and represents the second largest harvest on record.

Estimates of 2016 crop production indicate Manitoba crop producers increased production for dry peas by 110.0%, rye by 65.3%, grain corn by 48.4% and soybeans by 27.2%. Production of oats, barley and canola were down 15.5%, 4.6% and 4.0% respectively, while wheat production was unchanged.

In Manitoba, overall livestock prices in 2016 were lower than the 2014 and 2015 trends. Calf prices declined 29.0% in 2016 compared to 2015, while hog prices were down approximately 4.0%. Increased production in the U.S. pressured prices. Currently, strong global demand for meat has supported North American prices.

Hog marketing numbers are expected to be slightly lower in 2016 with international exports down 4.0%. However, Manitoba origin slaughter numbers are up by

approximately 1.0%, increasing value added processing in the province.

Cattle marketing in 2016 is expected to be similar to last year with international exports steady and little change in slaughter and inter-provincial exports. However, the significant decline in prices will reduce farm cash receipts.

Metallic Mining

In 2016, the value of metal mineral production (sales) in Manitoba increased by 2.1% to \$1.1 billion. Within the metallic mineral industry, the value of zinc sales increased by 35.8% and gold increased by 7.4%, while nickel and copper sales decreased by 15.7% and 3.0%, respectively.

Measured in extraction volumes, nickel production increased by 0.3% in 2016, compared to 2015. Copper and zinc production were also up 5.9% and 17.0%, respectively. In precious metals, Manitoba's gold production fell by 4.9% in 2016.

After a sharp drop in base metal prices in 2014 and 2015, prices stabilized and gradually improved in the second half of 2016.

The price of copper rose by 16.3% in January 2017 compared to the average in 2016. The price for nickel was up 6.4% in January 2017.

As inventories decline, zinc prices have jumped by 26.3% in January 2017 compared to the average in 2016. The price of gold was down by 5.0% in January 2017.
