

Section 13115MT610
Rotational slump, Churchill River
Elevation: 100 m
Latitude: 58.064 N Longitude: -94.815 W
Overlies the Paleozoic Platform
Situated 35 km east of the Precambrian Shield

*This section is exposed within the headscarp of a large rotational slump/earthflow.
Only a short time was spent at this section, and thus this is a simplification of the stratigraphy.*
