

A close-up photograph of a rock face. The rock is light-colored with numerous small, dark, reddish-brown spots (possibly iron oxide or mineral inclusions). A prominent, dark, irregular crack runs diagonally across the upper half of the image. In the lower right corner, a small, white, rectangular label is affixed to the rock. The label contains the handwritten text "12-90-9743" in black ink. The rock surface is textured and appears to be part of a larger geological formation.
