

Surficial geology of the Thuykay Lake area, Manitoba (parts of NTS 64I14, 15, 64P2, 3, 6, 7)

By M.S. Trommelen
Manitoba Geological Survey
Manitoba Mineral Resources

CONTENTS

This zipped dataset contains:

1. Map PDF (1:50 000 scale).
2. ESRI® Shapefiles
3. This ReadMe.docx file

FILES

In the root directory:

ReadMe.pdf – this file
MAP2013-1.pdf – Surficial geology map

FOLDERS

\Data – contains the major feature classes as ESRI® shapefiles

- **Map2013_1_geology.shp** – Surficial geology map polygons
- **geology.lyr** (for ArcMap)
- **Map2013_1_LineFeatures.shp** – Contains shape files of line feature classes (eskers, drumlins, drumlinoid ridges, meltwater channels and corridors, streamlined bedrock, trimlines, etc)
- **Linefeatures.lyr** (for ArcMap)
- **Map2013_1_PointFeatures.shp** – Contains shape files of point feature classes (outcrops, field sites, sample sites, striae, deltas, etc)
- **PointFeatures.lyr** (for ArcMap)
- **GSC_SymbolStandard1.ttf**– required to display point feature symbols

REQUIREMENTS

Viewing the included data requires either ESRI® ArcMap™ or similar GIS software capable of reading ESRI® shapefiles.

The documents in this zipped dataset are in Adobe® Portable Document Format (PDF) and require Adobe® Acrobat® Reader version 10 or newer for viewing and printing. The free reader can be downloaded from Adobe® at <http://www.adobe.com>.
