

Surficial geology of the Pady Lake area, Manitoba (parts of NTS 54L12, 13, 64I9, 16)

By M.S. Trommelen
Manitoba Geological Survey
Manitoba Mineral Resources

CONTENTS

This zipped dataset contains:

1. Map PDF (1:50 000 scale).
2. ESRI® Shapefiles
3. This ReadMe.docx file

FILES

In the root directory:

ReadMe.pdf – this file
MAP2013-4.pdf – Surficial geology map

FOLDERS

\Data – contains the major feature classes as ESRI® shapefiles

- **Map2013_4_geology.shp** – Surficial geology map polygons
- **geology.lyr** (for ArcMap)
- **Map2013_4_LineFeatures.shp** – Contains shape files of line feature classes (eskers, drumlins, drumlinoid ridges, meltwater channels and corridors, streamlined bedrock, trimlines, etc)
- **Linefeatures.lyr** (for ArcMap)
- **Map2013_4_PointFeatures.shp** – Contains shape files of point feature classes (outcrops, field sites, sample sites, striae, deltas, etc)
- **PointFeatures.lyr** (for ArcMap)
- **GSC_SymbolStandard1.ttf**– required to display point feature symbols

REQUIREMENTS

Viewing the included data requires either ESRI® ArcMap™ or similar GIS software capable of reading ESRI® shapefiles.

The documents in this zipped dataset are in Adobe® Portable Document Format (PDF) and require Adobe® Acrobat® Reader version 10 or newer for viewing and printing. The free reader can be downloaded from Adobe® at <http://www.adobe.com>.
