

LEGEND

Grade is indicated by numerals which correspond approximately to the established zones of metamorphism shown below:

8)	Sillimanite zone	} Amphibolite facies
7)	Staurolite zone	
6)	Garnet zone	
4)	Biotite zone	} Epidote-amphibolite facies
3)	Chlorite zone	
2)	Chlorite zone	} Greenschist facies
1)	Chlorite zone	

For full discussion see text.

SYMBOLS

E Epidote present
F Feldspar composition anomalous for the assemblage of minerals present
G Garnet present
K Potassium feldspar (microcline or/and orthoclase) present
Act. Actinolite present
Diop. Diopside present
N.d. Non-diagnostic mineral assemblage
5—2 Retrogression from higher to lower grade

VARIATIONS IN METAMORPHIC GRADE
