**AGGREGATE RESOURCES
COMPILATION MAP SERIES
MAP AR88-1-5
POINTE DU BOIS
NTS 52L**

This map is a compilation of all known aggregate deposits, gravel pits and bedrock quarries in the area. The deposits include sand, sand and gravel and gravel. No distinction has been made based on the quality of the deposits. Where the aggregate deposit is small or a local feature, only the pit symbol has been shown. Where several pits are located within a small area, a single symbol has been used.

The information is based on aggregate reports, preliminary maps, surficial geology reports, Manitoba Department of Highways and Transportation aggregate resource inventories and Manitoba Energy and Mines quarry mineral disposition files. Mineral ownership data was compiled from the above data sources and Crown Lands Branch. No distinction has been made based on the mineral ownership of the bedrock quarries. This map is not to be regarded as final interpretation of the geology and mineral ownership of the area. References are included for users wishing to verify critical information.

Reasonable effort has been made to ensure the accuracy of the information presented on this map. However, Manitoba Energy and Mines and UMA Engineering Ltd. assume no liability for any errors that may occur. Additional information concerning the aggregate deposits, gravel pits or bedrock quarries may be obtained from: Manitoba Energy and Mines, Aggregate Resource Section, 555-330 Graham Avenue, Winnipeg, Manitoba, Canada, R3C 4E3.

Compilation and Cartography by: UMA Engineering Limited.
