Address

Dear Sir:

**Crescent Point Energy Corporation  
East Manson Unit No. 2 Proposal and Water Flood Application  
Middle Bakken  
Section 3-13-28W1**

Crescent Point Energy Corporation (CPG) will be applying to the Manitoba Petroleum Branch pursuant to Section 116 of The Oil and Gas Act for a water flood in section 3-13-28W1. Section 71 of The Drilling and Production Regulations requires that all surface owners within the area of application and 500m surrounding the area of application receive notification of a water flood application.

CPG is proposing that the following wells be converted to Middle Bakken water injectors:

03/02-03-013-28W1/0 Hz (surface 02-10)  
02/03-03-013-28W1/0 Hz (surface 03-10)  
00/05-03-013-28W1/0 Vt  
00/08-03-013-28W1/0 Vt

Injected water will be a combination of Middle Bakken produced water and Lower Lodgepole water from a source well located at 00/01-09-013-28W1/0. Water will be transported by pipeline from the 16-4-13-28W1 battery site to each of the above injectors.

If you have any questions or concerns, please contact me at 403-767-6946 or [jsmith@crescentpointenergy.com](mailto:jsmith@crescentpointenergy.com).

Yours truly,

Jeff Smith  
Reservoir Engineering Technologist  
Crescent Point Energy
