INTRODUCTION

Ewart Unit No. 1 Enhanced Oil Recovery (EOR) Waterflood Project was approved under Waterflood Order No. 23, effective March 1, 2013 with Tundra Oil and Gas (Tundra) as Operator. The Unit area contains 8 producing vertical wells and 1 horizontal injector in 8 LSDs in Township 8 Range 28 W1 as shown in the figure below.

Figure 1: Ewart Unit No. 1 Area Outline

In accordance with Section 73 of the Manitoba Drilling and Production Regulation, Tundra hereby submits the following 2016 Annual Progress Report for Ewart Unit No. 1.

DISCUSSION

Production History

For the wells included in Ewart Unit No. 1, production started in November 2005 with the 00/02-09-008-28W1 well. Average oil production peaked at 3.68 m³/d per well in March

2008. This production was coming from 8 wells and totaled 29.44 m³/d for the Unit. In December 2016, the Unit was producing 4.05 m³/d of oil and 6.62 m³/d of water. The water oil ratio (WOR) averaged 1.66 m³/m³ over 2016. Water injection commenced in Ewart Unit No. 1 in July 2013. The rates and WOR are presented in Figure 2.

Figure 2: Ewart Unit 1 Production/Injection Rates and WOR vs Time

Figure 3 shows the cumulative production for Ewart Unit No. 1 to the end of December 2016 as 27.45 e³m³ of oil, and 29.21 e³m³ of water, representing an 11.3% recovery factor of the OOIP. The cumulative water injected is 25.09 e³m³.

Figure 3: Ewart Unit 1 Cumulative Oil, Water and Water Injected vs Time

Waterflood Development Plan

Ewart Unit No. 1 Waterflood (WF) Development Plan

Ewart Unit No. 1 is still in the development phase at the end of 2016. In November 2012, the single proposed horizontal injector for the unit was drilled (02/08-09-008-28W1/0) and put on production January 2013. In July 2013, the 02/08-09 well was converted to an injector. In July 2105, a horizontal well was drilled as a future inter-unit injector at 03/05-09-008-28W1/0 (Ewart Units 1/7) to improve waterflood recovery. Tundra expects to convert the 03/05-09 producer to an injector in 2018.

Production performance by injector pattern is summarized in Appendix A.

Any future revisions to the waterflood development or surveillance plan would be based on new production or performance response data, technical studies, or observed reservoir behavior and reserves recovery interpretations.

Waterflood EOR Operating Strategy and Performance

Water Source and Quality

The injection water for Ewart Unit No. 1 will be sourced from the 16-32-007-29W1 well (Lodgepole formation). The water is treated at the 03-04-008-29W1 battery where it is filtered to 0.5 microns and has scale inhibitor added. The injection water is then distributed to the injectors through the dedicated infrastructure system.

Injection Wellhead Pressures

Injection started in this Unit in July 2013. The average monthly wellhead injection pressure for the single injector in this Unit is summarized in Appendix C. Since injection in this Unit is still in the early stages, the injector is still building up to a target injection pressure of 6300 kPaa.

Reservoir Pressure

Where practical, Tundra is committed to collecting pressure data from newly drilled injection wells. For Ewart Unit No. 1, pressure data is currently available for the 02/08-09-008-28W1 location. A summary table is presented in Appendix B. Pressures are corrected to a common datum of -450 m SS for comparison with other units in the area.

Well Servicing

No maintenance was required on the 9 wells in Ewart Unit No. 1 in 2016.

Waterflood Performance Discussion

At the end of 2016, Ewart Unit No. 1 had 1 injection pattern in place. Since water injection started in July 2013, there is no waterflood analysis that can be done at this time.

A summary table of the injector pattern is presented in Appendix A. Plots of the production and injection data along with the VRR information are presented in Appendix D for each injector pattern(s).

List of Appendices

Appendix A: Injection Pattern Summary

Appendix B: Reservoir Pressure Summary

Appendix C: Average Monthly Injection Pressure Summary

Appendix D: Injector Pattern Production/Injection Rates, Cumulative and VRR Plot for
the following injector:
