

Appendix E

Annual Report Proposed Table of Contents

Trial Study Annual Report

Table of Contents (Draft)

The following is the Table of Contents for the proposed Trial Study Annual Report that will be prepared at the end of each year of the trial study. This Table of Contents should be considered as a draft and is subject to change.

The Annual Report will provide information on project activities that have occurred during the year and a detailed account of monitoring and testing data that has been collected, along with a discussion of data analysis and conclusions.

1. Executive Summary
2. Introduction
 - a. General Site Details
 - i. Location
 - ii. Environmental setting
 - b. Background
 - i. History
 - ii. Associated facilities
 - iii. Current water balance
 - iv. Current approvals
3. Overview of Current Operations
 - a. Mine and Mill Operations
 - b. Anderson TIA
 - i. Activities completed in current year
 - ii. Status of tailings deposition plan
 - iii. Updates to TARP
 - iv. General observations
 - v. Summary of public engagement activities
4. Environmental Monitoring Program
 - a. Overview of historical monitoring programs
 - b. Overview of monitoring completed in current year
 - c. Details on the water sampling program
 - d. Updates on the water quality model
 - e. Summary of other environmental studies completed
 - i. Geochemistry
 - ii. Bathymetry
 - iii. Aquatic studies (fish, benthic, and toxicity)
 - iv. Air Quality
 - v. Other

- f. Summary of comments and observations from the public, regulators, and academics
 - g. Discussion of results, with emphasis on any adverse impacts observed
 - h. Corrective actions and follow up monitoring (if any)
5. Conclusions
 6. Recommendations
 7. Summary of Activities Planned for the Next Year of Study
 8. References

The information contained within the Trial Study Annual Report will be support by maps, figures, drawings, data tables, reports, photographs, and correspondence when applicable.
