**Subject:** Approval to use cell 35 at BRRMF

**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

Good morning, Chris,

Thank you for your email request dated March 2, 2026, on behalf of the City of Winnipeg, to use the newly constructed 60 mil HDPE cell 35 at the Brady Road Resource Management Facility (BRRMF).

Your email includes a QA/QC report by MCL dated December 20, 2025, and a leak location test report by Groupe Alphard dated February 4, 2026, and submitted by AECOM Group on behalf of BRRMF. It may be noted that a leak detection report was submitted along with the QA/QC report, as the approvals branch was not able to inspect the southwest corner of Cell 35 before the liner was covered with granular material. I have reviewed the report and confirmed that it complies with the licence requirements. As per clause 35 of the licence, I approve you to use the newly constructed 60 mil HDPE cell 35 at BRRMF, following the limits, terms, and conditions outlined in the licence.

As part of this authorization, please submit an electronic copy of the record drawings following clause 139 of the licence.

Please note that this approval will be posted on the department's public registry.

If you have any questions regarding this authorization, please do not hesitate to contact me.

Thank you.

Regards,
