Director of Environmental Licenses  
Good Afternoon Tracey,

Our License #3166 - Our Client File # 5799.00

I have notified Peter Crocker that PMG at this point has not begun construction on the Parkland Mill property (and do not have an estimated date of start), with respect to staying in compliance with our environmental license specifically section 11 a)b)c) regarding maintenance and safety procedures and the like we would like to request an alteration and or delay in the applicability in that clause until we have a better idea when construction will commence and have secured the equipment.

If you graciously grant our request could you please let me know exactly at what point I would have to supply the info in Section 11.

Pauline Fondeur
